Specifically, the final rules, described below are designed to promote the use of geographically appropriate local numbers, while ensuring that the deaf and hard-of-hearing community has access to toll free telephone numbers that is

equivalent to access enjoyed by the hearing community.

Below are the new and revised information collection requirements contained in the Report and Order:

A. Provision of Routing Information

In addition to provisioning their registered users' routing information to the TRS Numbering Directory and maintaining such information in the database, the VRS and IP relay providers must ensure that the toll free number of a user that is associated with a geographically appropriate NANP number will be associated with the same Uniform Resource Identifier URI as that geographically appropriate NANP telephone number.

B. User Notification

In addition to the information that the Commission previously instructed VRS and IP Relay providers to include in the consumer advisories, VRS and IP Relay providers must also include certain additional information in their consumer advisories under the Report and Order. Specifically, the consumer advisories must explain: (1) the process by which a VRS or IP Relay user may acquire a toll free number from a toll free service provider, or transfer control of a toll free number from a VRS or IP Relay provider to the user; and (2) the process by which persons holding a toll free number may have that number linked to their ten-digit telephone number in the TRS Numbering Directory.
