

estimated respondent burden compared with the ICR currently approved by OMB. This decrease represents changes in the number of estimated submissions based on EPA's recent experience with TSCA section 8(e) notices plus the effects of optional electronic reporting. This change involves both a program change (electronic reporting) and an adjustment. The Supporting Statement provides additional detail concerning the change in burden estimate.

Abstract: The NESHAP for Boat Manufacturing (40 CFR Part 63, Subpart VVVV) covers resin and gel coat operations at fiberglass boat manufacturers, paint and coating operations at aluminum boat manufacturers, and carpet and fabric adhesive operations at all boat manufacturers. Owners or operators of boat manufacturing facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Boat manufacturing.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart VVVV).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, quarterly, and semiannually.

Total estimated burden: 23,543 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,303,583 (per year), includes \$800 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an adjustment increase in the respondent burden costs due to an increase in labor rate. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Acting Director, Collection Strategies Division.

Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Metal can manufacturing facilities with surface coating operations.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart KKKK).

Estimated number of respondents: 71 (total).

Frequency of response: Initially, occasionally, and semiannually

Total estimated burden: 27,517 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Therefore, the labor hours in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR. However, there is an adjustment increase in the respondent cost due to labor rate increases.
