Protection for Purchasers of Farm Products.” Nineteen States have certified central filing systems currently.

Title: “Clear Title” Regulations to implement section 1324 of the Food Security Act of 1985.

OMB Number: 0580–0016.

Expiration Date of Approval: May 31, 2014.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The information is needed to carry out the Secretary’s responsibility for certifying a State’s central filing system under section 1324 of the Act. Section 1324 of the Act enables States to establish central filing systems to notify potential buyers, commission merchants, and selling agents of security interests (liens) against farm products. The Secretary has delegated authority to GIPSA for certifying these systems. Currently, 19 States have certified central filing systems. The purpose of this notice is to solicit comments from the public concerning our information collection.

Estimate of Burden: Public reporting and recordkeeping burden for this collection of information is estimated to be 5 to 40 hours per response (amendments to certified systems require less time, new certifications require more time).

Respondents (Affected Public): States seeking certification of central filing systems to notify buyers of farm products of any mortgages or liens on the products.

Estimated Number of Respondents: Less than 1 per year. However, since the enactment of the Food Conservation and Energy Act of 2008, otherwise known as the 2008 Farm Bill, which amended the Act to allow States to maintain master debtor lists with Social Security numbers or taxpayer identification numbers that are encrypted for security purposes, we have had 3 requests for amendments.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 5–40 hours.

As required by the PRA (44 U.S.C. 3506(c)(2)(A)) and its implementing regulations (5 CFR 1320.8(d)(1)(i)), GIPSA specifically requests comments on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Larry Mitchell, Administrator, Grain Inspection, Packers and Stockyards Administration.

As the development of new and emerging technologies would not meet the classification of a Categorical
Exclusion (CE) in accordance with 7 CFR 1940.310 or a Class I EA in accordance with 7 CFR 1940.311. Furthermore, if after Agency review of proposals the Agency has determined that the proposal could result in significant environmental impacts on the quality of the human environment, an Environmental Impact Statement may be required pursuant to 7 CFR 1940.313.

DEPARTMENT OF COMMERCE
Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: 2014 Survey of Income and Program Participation (SIPP) Panel.

OMB Control Number: None.

Type of Request: New collection.

Burden Hours: 73,500.

Number of Respondents: 73,500.

Average Hours per Response: 1 hour.

Needs and Uses: The Census Bureau plans to conduct the 2014 Survey of Income and Program Participation (SIPP) Panel in four waves beginning in February 2014. The Census Bureau’s SIPP computer-assisted personal interviewing (CAPI) will use an Event History Calendar (EHC) interviewing method and a 12-month, calendar-year reference period in place of the current SIPP questionnaire approach that uses a sliding 4-month reference period. The Census Bureau is re-engineering the SIPP to accomplish several goals including re-engineering the collection instrument and processing system, development of the EHC in the instrument, use of administrative records data where feasible, and increased stakeholder interaction.

The main objective of the SIPP has been, and continues to be, to provide accurate and comprehensive information about the income and program participation of individuals and households in the United States. The survey’s mission is to provide a nationally representative sample for evaluating: (1) Annual and sub-annual income dynamics; (2) movements into and out of government transfer programs; (3) family and social context of individuals and households; and (4) interactions among these items. A major use of the SIPP has been to evaluate the use of and eligibility for government programs and to analyze the impacts of modifications to those programs. The re-engineering of SIPP pursues these objectives in the context of several goals including cost reduction, improved accuracy, increased relevance and timeliness, reduced burden on respondents, and increased accessibility. The 2014 SIPP Panel will collect detailed information on cash and non-cash income (including participation in government transfer programs) once per year.

A key component of re-engineering the SIPP is a shift from the every-four-month data collection schedule of historical SIPP (most recently in the 2008 Panel) to an annual data collection schedule for the re-engineered survey. To accomplish this shift with minimal impact on data quality, the Census Bureau will use an EHC based instrument to gather SIPP data. The EHC is intended to help respondents recall information in a more natural “autobiographical” manner by using life events as triggers to recall other economic events. For example, a residence change may often occur contemporaneously with a change in employment. The entire process of compiling the calendar focuses, by its nature, on consistency and sequential order of events, and attempts to correct for otherwise missing data. For example, unemployed respondents may undertake a lengthy job search before successfully finding employment. The EHC allows recording dates of events and spells of coverage and will provide measures of monthly transitions of program receipt and coverage, labor force transitions, health insurance transitions, and others. The EHC was previously used in the 2010, 2011, 2012, and 2013 SIPP–EHC field tests. Results from the 2010–2013 Field Tests and the 2008 SIPP Panel were used to inform final decisions regarding the design, content, and implementation of the 2014 SIPP Panel. The content of the 2014 SIPP Panel will match that of the 2013 SIPP–EHC very closely. The 2014 SIPP Panel design does not contain freestanding topical modules as in the prior production SIPP instruments; however, a portion of traditional SIPP topical module content is integrated into the main body of the 2014 SIPP interview.

The start of the 2014 SIPP Panel was scheduled at the earliest possible start (February 2014) that would allow the
