**SUPPLEMENTARY INFORMATION:****Executive Summary**

*Why we need to publish a rule.* This is a final rule to designate revised critical habitat for the Comal Springs dryopid beetle, Comal Springs riffle beetle, and Peck's cave amphipod. Under the Endangered Species Act of 1973, as amended (Act), any species that is determined to be an endangered or threatened species requires critical habitat to be designated, to the maximum extent prudent and determinable. Designations and revisions of critical habitat can only be completed by issuing a rule.

The areas we are designating as revised critical habitat in this rule constitute our current best assessment of the areas that meet the definition of critical habitat for the Comal Springs dryopid beetle, Comal Springs riffle beetle, and Peck's cave amphipod. Here, we are designating:

- Comal Springs dryopid beetle: 39.4 acres (ac) (15.56 hectares (ha)) of surface and 139 ac (56 ha) of subsurface critical habitat. The original designation was
