Notice of Availability of Record of Decision for Outdoor Research, Development, Test and Evaluation Activities at Naval Surface Warfare Center, Dahlgren Division, Dahlgren, VA

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Department of the Navy (DoN), after carefully weighing the strategic operational and environmental consequences of the proposed action, announces its decision to expand the Naval Surface Warfare Center, Dahlgren Division's (NSWCDD) outdoor research, development, test and evaluation (RDT&E) activities within the Potomac River Test Range (PRTR) complex, the Explosives Experimental Area range complex, the Mission Area, and special-use airspace at Naval Support Facility Dahlgren. These activities include outdoor operations that require the use of ordnance (guns and explosives), electromagnetic energy, high energy lasers, chemical and biological simulants (non-toxic substances used to mimic dangerous agents), and PRTR use. The DoN has decided to implement the preferred alternative, Alternative 2, which will enable NSWCDD to meet current and future mission-related warfare and force-protection requirements by providing RDT&E of surface ship combat systems, ordnance, lasers and directed energy systems, force-level warfare, and homeland and force protection.
