

domestic sheep can result in the transmittal of the disease, cause mortality to individual bighorn sheep, and affect herd health.

Other key issues identified and analyzed in the Final EIS involve the impact of livestock grazing on riparian area conditions and aquatic habitat causing the alteration of the health and composition of riparian vegetation communities, especially fish and amphibian habitat conditions; GRSG habitat conditions and the maintenance and enhancement of GRSG populations in accordance with BLM policy. Additionally, livestock grazing that may result in the reduction or removal of native vegetation communities that protect watershed soil and hydrologic function are analyzed in the Final EIS. Also included is an analysis of the potential effects of livestock grazing and trailing on special status plant species and their sustainability, as well as on the spread of noxious and invasive weeds. The BLM analyzed the potential effects of six alternative grazing systems. Alternative 1 is the No Action alternative, which analyzes the consequences of allowing current grazing management actions to continue. Alternative 2 reflects the applications proposed by the permittees currently authorized to graze in these allotments. This alternative is described as the Proposed Action and is, in this case, one that was developed by non-BLM parties. Alternative 3 analyzes the incorporation of a deferred grazing schedule where postponement or delay of grazing is used to achieve management objectives. Alternative 4 incorporates a grazing schedule that prescribes seasons-of-use changes including rest and deferment to protect and enhance high-value resources during certain times of the year. Both alternatives 3 and 4 may include animal unit month (AUM) reductions at varying levels. Alternative 5 addresses the effects specific to a change in livestock classification from sheep to cattle on a single allotment. Alternative 6 analyzes the effects of authorizing no grazing in the allotments for a period of 10 years. The Council on Environmental Quality (CEQ) directs the BLM to “identify the agency’s preferred alternative or alternatives, if one or more exists, in the draft statement and identify such alternative in the final statement unless another law prohibits the expression of such a preference (40 CFR 1502.14 (e)).” The BLM did not identify a preferred alternative during the Draft EIS public comment period but has identified a preferred alternative in the Final EIS, as required in the CEQ regulations and in

BLM policy. The preferred alternative is an allotment-specific composite of the different action alternatives, the effects of which are analyzed in the Final EIS. The preferred alternative includes a reconfiguration of two allotments into one, as requested by the permittees. Alternative 2 is identified for 6 of the allotments, Alternative 4 for 7 allotments, and Alternative 3 for the remaining 11 allotments in the group, including for the newly combined Wild Rat allotment.

Comments on the Draft EIS received from the public and internal BLM review were considered and incorporated, as appropriate, into the Final EIS. Public comments resulted in the addition of clarifying text but did not significantly change proposed decisions.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Notice of Realty Action: Classification and Segregation for Conveyance for Recreation and Public Purposes for a Sewage Treatment Facility; Partial Termination of Recreation and Public Purposes Classification of Public Lands in Storey County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM), Carson City District, Nevada, has examined and

found suitable for classification for conveyance approximately 12.38 acres of public land in Storey County, Nevada, under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended (NVN 082004). Storey County proposes to use the land for a sewage treatment facility to serve Virginia City, Nevada. This notice terminates the previous classification of a portion of land for conveyance under NVN 046965.

DATES: Interested parties may submit written comments regarding the proposed classification or conveyance on or before December 9, 2013.

ADDRESSES: Send written comments to Leon Thomas, Field Manager, BLM Sierra Front Field Office, 5665 Morgan Mill Rd., Carson City, NV 89701.

FOR FURTHER INFORMATION CONTACT: Erik Pignata, Realty Specialist, at the address in the **ADDRESSES** section or by telephone at 775-885-6110 or email at epignata@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Storey County filed an R&PP application to use public land to authorize and expand an existing sewage treatment facility in order to facilitate increased growth in the area and allow proposed system upgrades. The parcel of land is legally described as:

Mount Diablo Meridian, Nevada

T. 17 N., R. 21 E.

Sec. 28, Lots 38, 39, 43, 45.

The area described contains 12.38 acres more or less in Storey County.

A portion of the land was previously classified under NVN 046965 on behalf of an R&PP application submitted by the Storey County School District for authorization of the Virginia City High School. This notice terminates that classification NVN 046965 so far as it affects lands identified as Section 28, T. 17 N., R. 21 E., and classifies all the lands described above as suitable for the proposed use and conveyance for a sewage treatment facility.

The land is not required for any Federal purpose. The proposed conveyance is consistent with the BLM Carson City Field Office Consolidated Resource Management Plan dated May 2001, and would be in the public interest.
