DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Aging

Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Aging Special Emphasis Panel; Alzheimer’s Disease Sequencing Project.

Date: October 29, 2013.

Time: 8:00 a.m. to 6:00 p.m.

Place: DoubleTree by Hilton Hotel, 8120 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Elaine Lewis, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute on Aging, Gateway Building, Suite 2C212, MSC–9205, 7201 Wisconsin Avenue, Bethesda, MD 20892, 301–402–7707, elainelewis@nia.nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

NIST, 100 Bureau Drive, Green Auditorium, Gaithersburg, MD 20899–1070. The NIST campus is a highly secured area. Because of this, you are required to register in advance and must present a current government-issued identification card with photo when entering the facility. The Web address for registration is https://events-support.com/events/VDSP_Symposium_2013.

For further information contact: Ma. Cindy Rooney, ODS, National Institutes of Health, 6100 Executive Boulevard, Room 3B01, Bethesda, MD 20892–7523; email: rooneyc@mail.nih.gov.

Supplementary information: The ODS established the VDSP in November 2010 in an effort to standardize the laboratory measurement of vitamin D status worldwide. Standardization is essential to improve the detection, evaluation, and treatment of vitamin D deficiency and insufficiency by making measurements of serum total 25-hydroxyvitamin D [25(OH)D] accurate and comparable over time, location, and laboratory procedure.

The symposium on November 14 will (1) Describe the VDSP; (2) present data from the VDSP inter-laboratory comparison and commutability studies demonstrating its effectiveness; (3) demonstrate how tools developed through the VDSP can be used to improve the standardization of vitamin D measurement in the United States and around the world; and (4) solicit feedback from symposium participants on how the VDSP can be improved to meet the needs of participants. All participants must register at https://events-support.com/events/VDSP_Symposium_2013.

Dated: October 21, 2013.

Lawrence A. Tabak, Deputy Director, NIH.
