The 2012–2017 WPA/CPS Multisale EIS was completed in July 2012, The WPA/CPS/CPA 231 Supplemental EIS was completed in April 2013.

SUPPLEMENTARY INFORMATION: BOEM developed this Draft Supplemental EIS for proposed WPA Lease Sales 238, 246, and 248 to consider new information made available since completion of the 2012–2017 WPA/CPS Multisale EIS and WPA/CPS/CPA 231 Supplemental EIS, and to consider new information on the Deepwater Horizon explosion, oil spill, and response. This Draft Supplemental EIS provides updates on the baseline conditions and potential environmental effects of oil and natural gas leasing, exploration, development, and production in the WPA. BOEM conducted an extensive search for new information in consideration of the Deepwater Horizon explosion, by reviewing scientific journals and available scientific data and information from academic institutions and Federal, State, and local agencies; and by interviewing personnel from academic institutions and Federal, State, and local agencies. BOEM has examined the potential impacts of routine activities, potential accidental events, and the proposed lease sales’ incremental contribution to the cumulative impacts on environmental and socioeconomic resources. The oil and gas resource estimates and scenario information for this Draft Supplemental EIS are presented as a range that would encompass the resources and activities estimated for a proposed WPA lease sale.

In keeping with the Department of the Interior’s mission to protect natural resources, and to limit costs while ensuring availability of the document to the public, BOEM will primarily distribute digital copies of this Draft Supplemental EIS on compact discs.
