In 1952, the amateur archeologists donated some of the human remains to the UMMA, but the museum has no record of the cranium, potsherd, and faunal remains being donated. The human remains date to the Late Woodland Period (900–1200 A.D.) based on the presence of the potsherd. No known individuals were identified. No associated funerary objects are present.

On an unknown date prior to 1924, human remains representing, at minimum, 1 individual were removed from the Bunce Creek site (20SC05) in St. Clair County, MI. The remains of one adult (possibly female) were part of a larger collection of Native American human remains and cultural items collected by L.P. Rowland and sold to the UMMA in 1924. An amateur archeologist later visited the site in 1936, and dated it to the Early-to-Late Woodland Period. No known individuals were identified. No associated funerary objects are present.
