SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new collection of information.

The objective of the survey is to collect information on both trip

expenditures and annual durable good expenditures made by marine recreational anglers. The survey will be conducted in two parts. The first part of the survey, planned for 2014, will ask anglers about their purchases of durable goods such as fishing gear, boats, vehicles, and second homes. The second part, planned for 2016, will ask anglers about the expenses incurred on their most recent marine recreational fishing trip. As specified in the Magnuson-Stevenson Fishery Conservation and Management Act of 1996 (and reauthorized in 2007), NMFS is required to enumerate the economic impacts of the policies it implements on fishing participants and coastal communities. The expenditure data collected in this survey will be used to estimate the economic contributions and impacts of marine recreational fishing to each coastal state and nationwide.

II. Method of Collection

The survey will be conducted using two modes: in-person interviews and/or mail.
