from the United States to Canada
pursuant to section 202(e) of the Federal
Power Act.

SUPPLEMENTARY INFORMATION:
Exports of electricity from the United States to a
foreign country are regulated by the
Department of Energy (DOE) pursuant to
sections 301(b) and 402(f) of the
Department of Energy Organization Act
(42 U.S.C. 7151(b), 7172(f)) and require
authorization under section 202(e) of the
Federal Power Act (16 U.S.C.
824a(e)).

On March 26, 2009, DOE issued Order
No. EA–258–C to transmit electric
energy from the United States to Canada
as a power marketer for a five-year term
using existing international
transmission facilities. That authority
expires on April 23, 2014. On October
24, 2013, BEMI filed an application with
DOE for renewal of the export authority
contained in Order No. EA–258–C for an
additional five-year term.

BEMI states that it does not own,
operate, or control any physical assets
such as electric generating or
transmission facilities, and it does not
have a franchised service area. The
electric energy that BEMI proposes to
export to Canada would be surplus
energy purchased from electric utilities
and other suppliers within the United
States. The existing international
transmission facilities to be utilized by
BEMI have previously been authorized
by Presidential permits issued pursuant
to Executive Order 10485, as amended,
and are appropriate for open access
transmission by third parties.

Procedural Matters: Any person
desiring to be heard in this proceeding

application at the address provided
above. Proceedings should be filed in

Environmental Policy Act Implementing
Procedures (10 CFR Part 1021) and after
determination is made by DOE that the
proposed action will not have an
adverse impact on the sufficiency of
supply or reliability of the U.S. electric
power supply system.

Copies of this application will be
made available, upon request, for public
inspection and copying at the address
provided above, by accessing the
