Community involvement activities associated with the deletion will consist of issuing a deletion fact sheet, publishing a public notice in the local newspaper, updating the information repository, and providing the public an opportunity to comment.

Determination That the Site Meets the Criteria for Deletion in the NCP

The NCP (40 CFR 300.425(e)) states that a site may be deleted from the NPL when no further response action is appropriate. The implemented remedy achieves the degree of cleanup specified in the ROD and ROD Amendments for all pathways of exposure. All selected remedial action objectives and clean-up goals are consistent with agency policy and guidance. EPA, in consultation with the State of South Carolina, has determined that all required response actions have been implemented and no further response action by the responsible parties is appropriate.

V. Deletion Action

The EPA, with concurrence of the State of South Carolina through the South Carolina Department of Health and Environmental Control has determined that all appropriate response actions under CERCLA, other than operation, maintenance, monitoring and five-year reviews have been completed. Therefore, EPA is deleting the Site from the NPL.

Because EPA considers this action to be noncontroversial and routine, EPA is taking it without prior publication. This action will be effective January 6, 2014 unless EPA receives adverse comments by December 5, 2013. If adverse comments are received within the 30-day public comment period, EPA will publish a timely withdrawal of this direct Final Notice of Deletion before the effective date of the deletion, and it will not take effect. EPA will prepare a response to comments and continue with the deletion process on the basis of the notice of intent to delete and the comments already received. There will be no additional opportunity to comment.

Needs and Uses: The FCC Form 175 is used by the public to apply to participate in competitive bidding (auctions) for Commission licenses and permits. The information collected on FCC Form 175 is used by the Commission to determine if an applicant is legally, technically, and financially qualified to participate in a Commission auction. Commission staff reviews the information collected on FCC Form 175 for a particular auction as part of the pre-auction process, prior to the auction being held, to determine whether each applicant satisfies the Commission's requirements to participate in the auction and, if applicable, is eligible for the status as the particular type of auction participant it requested. The revised collection will enable the Commission to comply with Section 6004 and determine whether an applicant's participation in an auction conducted

pursuant to the 2012 Spectrum Act is consistent with Section 6004.
