NUCLEAR REGULATORY COMMISSION

[NRC–2013–0246; IA–13–024]

In the Matter of Landon E. Brittain; Order Prohibiting Involvement In NRC-Licensed Activities (Effective Immediately)

I

Landon E. Brittain was formerly employed as a senior reactor operator (SRO) at the Exelon Dresden Nuclear Power Station (Dresden Station). Mr. Brittain was the holder of SRO license No. SOP–32151 issued by the Nuclear Regulatory Commission (NRC) pursuant to Part 55 of Title 10 of the *Code of Federal Regulations* (10 CFR). The license authorized Mr. Brittain to manipulate the controls of the Dresden Station, Facility License Nos. DPR–19 and DPR–25, located in Morris, Illinois. Dresden Station requested the termination of Mr. Brittain's license, and on June 25, 2012, the license was terminated by the NRC.

II

An investigation was initiated by the NRC Office of Investigations on June 6, 2012, to determine if Mr. Brittain, an equipment operator, or other personnel had knowledge of another SRO planning to commit a violent crime off-site and willfully failed to report that SRO to management for aberrant behavior. This investigation revealed that in mid-July 2011, Mr. Brittain, along with another SRO, began planning and attempted to recruit other resources to assist in an armored car robbery.

However, on May 9, 2012, the other SRO was apprehended by police after hijacking a car at gunpoint. That SRO was later released on bail and apparently fled the country. Although at the time Mr. Brittain was not charged for the crime, he fled the country, was later apprehended in Venezuela, and has been extradited to the United States. As of the date of this Order, Mr. Brittain is under indictment for aggravated vehicular hijacking, vehicular hijacking, and obstruction of justice.

Section 73.56(f)(3) of 10 CFR requires, in part, that individuals who are subject to an access authorization program, at a minimum, report any concerns arising from behavioral observation, including,
