For the foregoing reasons, the agency hereby grants in full Porsche’s petition for exemption for the Porsche Macan vehicle line from the parts-marking requirements of Part 541. The agency notes that 49 CFR Part 541, Appendix A–1, identifies those lines that are exempted from the Federal Motor Vehicle Theft Prevention Standard for a given model year. 49 CFR Part 543.7(f) contains publication requirements incident to the disposition of all Part 543 petitions. Advanced listing, including the release of future product nameplates, the beginning model year for which the petition is granted and a general description of the antitheft device is necessary in order to notify law enforcement agencies of new vehicle lines exempted from the parts marking requirements of the Federal Motor Vehicle Theft Prevention Standard.

The agency notes that Porsche was significantly delayed in submitting its petition for exemption for its MY 2014 Macan vehicle line. As specified under paragraph (4) of §543.5(b), a petition for an exemption must be submitted at least 8 months before the commencement of production for the first model year in which the petitioner wishes those lines to be exempted. Porsche is reminded of its statutory requirement for meeting this timeline when submitting future petitions for exemptions.

If Porsche decides not to use the exemption for this line, it must formally notify the agency. If such a decision is made, the line must be fully marked according to the requirements under 49 CFR 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if Porsche wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Part 543.7(d) states that a Part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line’s exemption is based. Further, Part 543.9(c)(2) provides for the submission of petitions “to modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in that exemption.”

The agency wishes to minimize the administrative burden that Part 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting Part 543 to require the submission of a modification petition for every change to the current design of an antitheft device. The significance of many such changes could be de minimis. Therefore, NHTSA suggests that if the manufacturer contemplates making any changes, the effects of which might be characterized as de minimis, it should consult the agency before preparing and submitting a petition to modify.

Christopher J. Bonanti, Associate Administrator for Rulemaking.
