

submission to OMB. Applying a 20% reduction to its previous estimates, the staff now assumes that large manufacturers spend an average of 33.6 hours per year and that small manufacturers spend an average of 8 hours per year to comply with the Rule. Accordingly, the total annual burden incurred by manufacturers is approximately 130,968 hours ((581 large manufacturers × 33.6 hours) + (13,935 small manufacturers × 8 hours)).

Thus, the total annual burden for all covered entities is approximately 2,446,610 hours (2,315,608 hours for retailers + 131,002 hours for manufacturers).

Total annual labor cost: \$53,825,000 (rounded to nearest thousand).

The work required to comply with the Pre-Sale Availability Rule entails a mix of clerical work and work performed by sales associates. Staff estimates that half of the total burden hours would likely be performed by sales associates. At the manufacturing level, this work would entail ensuring that the written warranty accompanies every consumer product or that the required warranty information otherwise gets to the retailer. At the retail level, this work would entail ensuring that the written warranty is made available to the consumer prior to sale. The remaining half of the work required to comply with the Pre-Sale Availability Rule is clerical in nature, e.g., shipping or otherwise providing copies of manufacturer warranties to retailers and retailer maintenance of them. Applying a sales associate wage rate of \$25/hour to half of the burden hours and a clerical wage rate of \$19/hour to half of the burden hours, the total annual labor cost burden is approximately \$53,825,420 (1,223,305 hours × \$25 per hour) + (1,223,305 hours × \$19 per hour).⁴

Total annual capital or other non-labor costs: De minimis.

The vast majority of retailers and warrantors already have developed systems to provide the information the Rule requires. Compliance by retailers typically entails keeping warranties on file, in binders or otherwise, and posting an inexpensive sign indicating warranty availability. Manufacturer compliance entails providing retailers with a copy of the warranties included with their products.

Information Collection Request Title: Support and Services at Home (SASH) Participant Survey

Abstract: The Office of the Assistant Secretary for Planning and Evaluation (ASPE) is requesting approval from the Office of Management and Budget (OMB) to conduct a survey of Support And Services at Home (SASH) participants to assess the impact of the SASH program on health outcomes. Information collected includes general health status, functional status, quality of life, medication problems and dietary issues. The SASH program operates in Vermont and links staff based in housing properties with a team of community-based health and supportive services providers to help older adults coordinate and manage their care needs. SASH services include: assessment by a multidisciplinary team, creation of an individualized care plan, on-site nursing and care coordination with team members and other local partners, and community activities to support health and wellness. SASH is anchored in affordable senior housing properties, serving residents in the property and seniors living in the surrounding community.

The goal of this project is to conduct a comprehensive evaluation of the SASH program. The evaluation will assess whether the SASH model of coordinated health and supportive services in affordable housing improves quality of life, health and functional status of participants. The evaluation has been designed to comprehensively address the research questions while minimizing the burden placed on the SASH program staff, their partners (e.g., service providers), and Medicare and dually eligible Medicare and Medicaid beneficiaries. The mail survey is designed to collect outcomes that cannot be measured from claims data or other sources. We will use brief, standardized scales with demonstrated reliability and validity in older adults.

Information collected in the survey is not of a sensitive nature. Questions in the beneficiary survey are confined to health outcomes. RTI International will conduct and analyze the survey. RTI has experience doing similar work for ASPE and other government clients.

Need and Proposed Use of the Information: To determine the impact of the SASH program on quality of life, health and functional status of participants. Care has been taken to ensure that there is no overlap between other ongoing state evaluations. Through discussions with SASH program staff and other state officials in Vermont, we determined that the information we seek to collect is not already being collected from our proposed sample, nor can it be measured from claims data. As a result of these efforts, the information collected through the survey will not duplicate any other effort and is not obtainable from any other source.

Likely Respondents: The target population for the survey is Medicare beneficiaries participating in the Support and Services at Home (SASH) demonstration. SASH provides integrated, home-based services to beneficiaries in selected housing properties throughout Vermont. At this point, 1,685 intervention beneficiaries have been identified in 37 SASH sites.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions, to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information, to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information, and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
SASH Participant Survey	669	1	20/60	223
Total	669	1	20/60	223
