SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork

and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The paperwork provisions of the Standard on Overhead and Gantry Cranes specify requirements for: Marking the rated load of cranes; and preparing certification records to verify the inspection of the crane hooks, hoist chains, and rope; preparing reports of rated load tests for repaired hooks or modified cranes. Records and reports must be maintained and disclosed upon request.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that it retain its previous estimate of 321,380 burden hours. This is a result of no new information on the number of overhead and gantry cranes in use.

Type of Review: Extension of a currently approved collection.

Title: Overhead and Gantry Cranes (29 CFR 1910.179).

OMB Control Number: 1218-0224.

Affected Public: Business or other for-profits.

Number of Respondents: 31,495.

Frequency of Responses: On occasion; monthly; semi-annually.

Average Time per Response: Varies from 5 minutes (.08 hour) to disclose certification records to 2 hours to obtain and post rated load information on cranes.

Estimated Total Burden Hours: 321,380.

Estimated Cost (Operation and Maintenance): \$0.

If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**).
