SUPPLEMENTARY INFORMATION: We are advising the public of the availability of the ROD associated with an ITP application received from NiSource, Inc., pursuant to the ESA. The ITP issued to NiSource authorizes the take of 10 federally listed species over a 50-year period.

NiSource prepared a multi-species habitat conservation plan (MSHCP) to cover a suite of activities associated with operation, maintenance, and construction of their existing natural gas pipeline system in the States of Delaware, Indiana, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia.

The Service was the lead Federal agency for review of the application and preparation of the Final Environmental Impact Statement (FEIS) for the proposed permit issuance. The Federal Energy Regulatory Commission (FERC), the U.S. Army Corps of Engineers (USACE), the U.S. Department of Agriculture (USDA) Forest Service (FS) Eastern Region and Southern Region, and the National Park Service (NPS) Southeast Region served as cooperating agencies. Availability of the FEIS was published in the **Federal Register** on June 7, 2013 (78 FR 34402), and June 14, 2013 (78 FR 35928).

Background

NiSource, Inc., headquartered in Merrillville, Indiana, is engaged in natural gas transmission, storage, and distribution, as well as electric generation, transmission, and distribution. NiSource, Inc.'s wholly owned pipeline subsidiaries, Columbia Gas Transmission, LLC; Columbia Gulf Transmission LLC; Crossroads Pipeline Company; Central Kentucky Transmission Company; and NiSource Gas Transmission and Storage Company (companies referred to collectively as "NiSource"), are interstate natural gas companies whose primary operations are subject to the Natural Gas Act (15 U.S.C. 717) and fall under the jurisdiction of the Federal Energy Regulatory Commission (FERC) and the U.S. Department of Transportation

(USDOT). NiSource applied for authorization under the ESA to take species in the course of engaging in otherwise lawful gas transmission and storage operations. An ITP application under the ESA requires submission of a Habitat Conservation Plan in conjunction with the application.

On July 16, 2009, NiSource filed an application with the Service for a section 10(a)(1)(B) ITP for 10 ESA-listed species known to occur within NiSource's operating territory. These species include the Indiana bat (*Myotis sodalis*), bog turtle (*Glyptemys muhlenbergii*), Madison Cave isopod (*Antrolana lira*), clubshell mussel (*Pleurobema clava*), northern riffleshell mussel (*Epioblasma torulosa rangiana*), fanshell mussel (*Cyprogenia stegaria*), James spiny mussel (*Pleurobema collina*), sheepsnose mussel (*Plethobasus cyphus*), Nashville crayfish (*Orconectes shoupi*), and American burying beetle (*Nicrophorus americanus*). The MSHCP was prepared to cover a 50-year timeframe.

The Covered Land for the MSHCP and ITP includes 12 counties in Maryland, Ohio, Pennsylvania, and West Virginia, and a 1-mile-wide corridor associated with 15,562 miles of existing NiSource right-of-way within the 14 aforementioned States.

The Covered Activities, or those NiSource activities that fall under the purview of the MSHCP, include a wide range of operation, maintenance, and new construction activities that are specific to NiSource's wholly owned pipeline subsidiaries and to the Covered Land specified in the MSHCP.

The MSHCP evaluated 42 species that could potentially occur within the NiSource Covered Land, and that could potentially be impacted by NiSource Covered Activities. However, after analysis of the 42 species and the Covered Land, it was concluded that NiSource Covered Activities will not adversely impact 32 of the 42 species evaluated. Therefore, NiSource requested incidental take for the remaining 10 species, for which take could be minimized, but not avoided.

In addition to the 42 species evaluated in the MSHCP, 47 additional ESA-listed, proposed, or candidate species are either known to occur or potentially occur within the NiSource Covered Land. Potential impacts to these species are discussed in the FEIS and in the Service's Biological Opinion.
