

A. Overview of Information Collection

Title of Information Collection: Generic Customer Satisfaction Surveys Physical Inspection Alignment Pilot Program—Expansion Announcement.

OMB Approval Number: 2535–0116.

Type of Request: Change Request.

Form Number: N/A.

Description of the need for the information and proposed use: This collection would assist the working group in better understanding the capabilities of state agencies to conduct inspections and their level of interest in participating in an expanded pilot. While candidates to join the pilot could be selected through limited private contact, this announcement creates a more even playing field for states who may wish to participate rather than favoring those states which may have heard about the program through other means. The responses will also be used by the working group to refine our communications, outreach, and training approaches. The working group has received positive feedback from states that the collaboration it facilitates is valuable and is something that they actively seek to participate in.

This is an existing pilot program currently involving less than ten respondents. This information will primarily be used by the working group to improve the administration of the pilot. It will also allow the working group to identify states that might be interested in participating in an expanded 2014 pilot. This information will not be distributed beyond the working group, nor will it be used for any other purpose.

Respondents (i.e. affected public): State housing agencies.

Estimated Number of Respondents: 70.

Estimated Number of Responses: 25.

Frequency of Response: 1 time.

Average Hours per Response: .25 hour.

Total Estimated Burdens: 6.25.

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
