

Historic Preservation Act, FLPMA, and the Clean Water Act, but found the 2010 BiOp and BLM ROD to be inadequate.

In a published opinion, the court vacated the 2010 BiOp and remanded the matter to the FWS. The court held that the FWS' consideration of Ruby's Endangered Species Act (ESA) Conservation Action Plan (CAP) as cumulative effects in the 2010 BiOp was arbitrary and capricious. The court also found that the 2010 BiOp did not adequately consider whether groundwater withdrawals associated with hydrostatic testing and dust abatement would impact listed fish that occur in surface waters. The court vacated the BLM's ROD because it relied on the 2010 BiOp and remanded the matter to the BLM.

In an unpublished opinion, the court found that the Final EIS for the Project did not provide sufficient quantified or detailed data about the cumulative loss of sagebrush steppe vegetation and habitat and did not provide information on how much acreage sagebrush steppe used to occupy, or what percentage has been destroyed. Thus, the court remanded the ROD to the BLM for further analysis of cumulative impacts to sagebrush steppe vegetation and habitat. The court subsequently stayed vacature of the 2010 BiOp until the FWS issued the Revised BiOp and stayed vacature of the ROD until the BLM issues a new ROD.

The 2010 BiOp found that the proposed action was not likely to jeopardize the continuing existence of any of the listed species or result in destruction or adverse modification of designated critical habitats. The findings of the Revised BiOp are consistent with those reached in the 2010 BiOp.

The FWS also affirmed the accuracy of the incidental take statement found in the 2010 BiOp and incorporated it by reference. Those conclusions were drawn without consideration of or reliance on the ESA CAP. The conservation recommendations described in the 2010 BiOp were reviewed by the FWS, were determined to stand as written, and were incorporated by reference. The court did not rule that the discussion of the conservation agreement or groundwater extraction in the Final EIS was deficient or in violation of NEPA, so these topics are not analyzed in the Supplemental EIS.

In the Final EIS, Draft Supplemental EIS, and Final Supplemental EIS, the BLM provided quantified and detailed data regarding the cumulative loss of sagebrush steppe vegetation and habitat, including information on how much

acreage sagebrush steppe used to occupy, and what percentage has been lost. The Ruby Pipeline Project's direct and indirect impacts remain the same as those discussed in the Final EIS. The Final Supplemental EIS thoroughly discusses the cumulative impacts to sagebrush steppe habitat within the cumulative impact area and summarizes the substantial mitigation required by the BLM's July 12, 2010, ROD (and FERC's Certificate). The mitigation measures required by the July 12, 2010, ROD are intended to address the significant long-term impacts to sagebrush steppe habitat related to the Project. All elements of the July 12, 2010, ROD and subsequent BLM decisions remain in full force and effect, including all stipulations, monitoring, and mitigation measures. Those same stipulations, monitoring, and mitigation measures are required by this ROD. The BLM concludes that those mitigation measures are adequate and additional mitigation measures are not required.

The BLM published a *Notice of Availability of the Draft Supplemental Environmental Impact Statement for the Ruby Pipeline Project* on July 5, 2013 (78 FR 40496). The release of the Draft Supplemental EIS initiated a formal 45-day public comment period that ended on August 19, 2013.

The BLM received 31 comment submissions on the Draft Supplemental EIS from the public, agencies, tribes, organizations, and businesses during the comment period. Substantive comments were considered during preparation of this Final Supplemental EIS. Comments resulted in the addition of clarifying text, but did not significantly change the analysis or the proposed decisions.

Filing an Appeal: Instructions for filing an appeal of this Decision are described in the ROD.
