

subsequent construction of the recommended alternative which included a 13 foot cantilever wall on top of the dam, an additional concrete monolith on the east abutment, a floodgate closure across WV Rt. 20, removable closures at each end of the spillway, high strength anchors placed into the dam itself, massive concrete blocks placed against the downstream face of the dam, and a pavement for scour protection downstream of the hydropower penstocks. Ongoing construction on these measures will likely continue through the year 2020.

d. Physical modeling and expert analysis conducted during project construction has shown that the downstream bedrock is vulnerable to erosion during high flow events as a result of deficiencies with the current stilling basin configuration. This potential erosion creates an unacceptable level of risk according to guidelines established in Chapter 5 of ER 1110–2–1156, under which this study is being conducted.

e. The supplemental EIS and Dam Safety Modification report (DSMR) will consider the structural integrity of the dam, its ability to accommodate flood waters as well as transportation, noise, terrestrial, aquatic, economic, environmental justice and cultural resource issues associated with the performance of the dam. The supplemental EIS and DSMR will recommend any modifications necessary to ensure the long-term safe performance of the structure as originally intended.

f. Modifications to meet current acceptable risk guidelines per ER 1110–2–1156 may include, modification of the existing stilling basin, modification of other dam components, construction of an alternative/auxiliary stilling basin, construction of an alternative/auxiliary spillway and non-structural measures or other actions to prevent overtopping. The No Action alternative will also be considered. As required by NEPA and Corps of Engineers planning guidance, the No Action alternative will form a benchmark from which alternatives are evaluated and compared.

3. *Public Participation:* a. The Corps of Engineers will conduct a public scoping meeting on December 5, 2013 to gain input from interested agencies, organizations, and the general public concerning the content of the supplemental EIS, issues and impacts to be addressed in the supplemental EIS, and alternatives that should be analyzed. The meeting will be held from 6:00 p.m. to 9:00 p.m. at the Summers County Memorial Building, 97 Park Avenue, Hinton, WV 25951.

b. The Corps invites full public participation to promote open communication and better decision-making. All persons and organizations that have an interest in the Bluestone Dam Project are urged to participate in this NEPA evaluation process. Assistance will be provided upon request to anyone having difficulty with learning how to participate.

c. Public comments are welcomed anytime throughout the NEPA process. Formal opportunities for public participation include: (1) Public meeting/s to be held near the community of Hinton; (2) Anytime during the NEPA process via mail, telephone or email; (3) During Review and Comment on the Draft EIS; and (4) Review of the Final EIS. Schedules and locations will be announced in local news media. Interested parties should submit contact information to be included on the mailing list for public distribution of meeting announcements and documents (See **ADDRESSES**).

4. *Schedule:* The Draft Supplemental Environmental Impact Statement is tentatively scheduled to be released for public review and comment in June 2015. The Final Report and Final EIS are tentatively scheduled to be completed in October 2015.
