

the 60-Day Notice, PHMSA anticipated a total of 30 shippers and carriers (assuming 10 respondents for each of three test regions) and a burden of no more than four hours per shipper and carrier for the entirety of the test period; however, based on the number of entities who commented to the 60-Day Notice and indicated they wish to participate in the pilot tests, PHMSA has increased its estimate to 40 shippers and carriers for this information collection activity. The resulting estimated total burden is 160 hours (40 respondents x 4.0 hour per respondent = 160 hours) for follow-up discussions and associated information collection with shippers and carriers.

Inspection Simulation Questions: 260 Respondents x 1.0 Hr. = 260 Hours

PHMSA does not anticipate that answering the list of inspection simulation questions will impose a significant burden on inspectors. PHMSA anticipates no more than 260 inspection simulations will be conducted utilizing non-federal resources (encompassing all pilot tests, all participants, and each test region throughout the entirety of the test period), resulting in a total of 260 respondents. The 260 respondent estimate has been increased by 20 from the original 240 estimate posted in the 60-Day Notice based on the number of inspectors who commented to the 60-Day Notice and indicated they wish to participate in the pilot tests. PHMSA estimates it will take each inspector approximately 60 minutes to answer the list of inspection simulation questions, based on the type of questions identified in the following table, and to submit a copy of the e-HM shipping paper to PHMSA.

The resulting estimated total burden is 260 hours (260 respondents x 1.0 hour per respondent = 260 hours) for the inspection simulation question data collection.

Emergency Response Simulation Questions: 24 Respondents x 1.0 Hr. = 24 Hours

PHMSA does not anticipate that answering the list of emergency response simulation questions will impose a significant burden on investigators and emergency responders. PHMSA anticipates no more than 12 emergency response simulations will be conducted utilizing non-Federal resources, resulting in a total of no more than 24 respondents allowing for up to two respondents per simulation (12 emergency response providers and 12 investigators). PHMSA estimates it will take each respondent approximately 60 minutes to answer the list of emergency response simulation questions, based on the type of questions identified in the following table, and to submit a copy of the electronic shipping paper to PHMSA.

Total number of emergency response simulation questions	42

The resulting estimated total burden is 24 hours (24 respondents x 1.0 hour per respondent = 24 hours) for the emergency response simulation question data collection.

Impact Analysis Questions: 250 Respondents x 1.5 Hr. = 375 Hours

PHMSA does not anticipate that answering the list of impact analysis questions will impose a significant burden on respondents (shippers, carriers, law enforcement, and emergency responders). PHMSA increased its original estimate posted in the 60-Day Notice from 200 to 250 respondents based on the number of entities who provided comments to the 60-Day Notice. PHMSA estimates no more than 250 respondents will complete the impact analysis questions, and that it will take each respondent approximately 90 minutes to answer the questions.

The resulting estimated total burden is 375 hours (250 respondents x 1.5 hours per respondent = 375 hours) for the impact analysis question data collection.
