

standard without emissions reductions associated with the use of gasoline with an RVP of 7.8 psi in the four Triad Area counties during the high ozone season—June 1 through September 15.

In addition, due to the updated modeling reflecting a change in the applicable RVP standard, the North Carolina revision also includes an updated on-road mobile, non-road mobile and area source emissions for the Triad Area. EPA is also proposing approval of this revision.

EPA has preliminarily determined that North Carolina's April 12, 2013, SIP revision, including the technical demonstration associated with the State's request for the removal of the Federal RVP requirements, and the updated on-road mobile, non-road mobile and area source emissions are consistent with the applicable provisions of the CAA. Should EPA decide to remove subject portions of the Triad Area from those areas subject to the 7.8 psi Federal RVP requirements, such action will occur in a separate, subsequent rulemaking.

## VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submittal that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, October 7, 1999);

- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### 50 CFR Part 17

**[Docket No. FWS-R6-ES-2013-0120; 4500030113]**

#### **Endangered and Threatened Wildlife and Plants; Initiation of Status Review of Arctic Grayling in the Upper Missouri River System**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of initiation of status review.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), under the authority of the Endangered Species Act of 1973, as amended (Act), announce the initiation of a status review of the Arctic grayling (*Thymallus arcticus*) upper Missouri River system distinct

population segment (DPS). We conduct status reviews to determine whether the entity meets the definition of an endangered or threatened species under the Act. Following this status review, we will issue a proposed listing rule or a not warranted finding for the Arctic grayling upper Missouri River system DPS. Through this document, we encourage all interested parties to provide us information regarding the Arctic grayling in the upper Missouri River basin.

**DATES:** To allow us adequate time to conduct this review, we request that we receive information no later than December 26, 2013. Information submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES** section, below) must be received by 11:59 p.m. Eastern Time on the closing date. After December 26, 2013, you must submit information using the U.S. mail or hand-delivery option provided in the **ADDRESSES** section below. Please note that we may not be able to address or incorporate information that we receive after the above requested date.

**ADDRESSES:** You may submit information by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS-R6-ES-2013-0120, which is the docket number for this rulemaking. Then, in the Search panel on the left side of the screen, under the Document Type heading, click on the Proposed Rules link to locate this document. You may submit a comment by clicking on "Comment Now!"

(2) *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS-R6-ES-2013-0120; Division of Policy and Directives Management; U.S. Fish and Wildlife Service; 4401 N. Fairfax Drive, MS 2042-PDM; Arlington, VA 22203.

We request that you send information only by the methods described above. We will post all submissions on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see the Request for Information section below for more information).

**FOR FURTHER INFORMATION CONTACT:** Jodi Bush, Field Supervisor, Montana Field Office, 585 Shepard Way, Suite 1, Helena, MT 59601; telephone (406) 449-5225, extension 205. If you use a telecommunications device for the deaf (TDD), please call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

**SUPPLEMENTARY INFORMATION:**

## Background

The Arctic grayling is a fish belonging to the family Salmonidae (salmon, trout, charr, whitefishes), subfamily *Thymallinae* (graylings), and is represented by a single genus, *Thymallus* (Scott and Crossman 1973, pp. 301–302; Behnke 2002, pp. 327–331). Arctic grayling have long, thin bodies with deeply forked tails, and adults typically average 254 to 330 millimeters (10 to 13 inches) in length. Coloration varies from silvery or iridescent blue and lavender, to dark blue (Behnke 2002, pp. 327–328). Arctic grayling have a prominent sail-like dorsal fin, which is large and vividly colored with rows of orange to bright green spots, and often has an orange border. Dark spots often appear on the body toward the head (Behnke 2002, pp. 327–328).

Arctic grayling are native to Arctic Ocean drainages of northwestern Canada and Alaska; the Peace, Saskatchewan, and Athabasca River drainages in Alberta, eastward to Hudson Bay and westward to the Bering Straits; and eastern Siberia and northern Eurasia (Scott and Crossman 1973, pp. 301–302). Arctic grayling also are native to Pacific coast drainages of Alaska and Canada as far south as the Stikine River in British Columbia (Scott and Crossman 1973, pp. 301–302; Nelson and Paetz 1991, pp. 253–256; Behnke 2002, pp. 327–331).

Pleistocene glaciations isolated two North American populations of Arctic grayling outside of Canada and Alaska (Vincent 1962, pp. 23–31). One population occurred in streams and rivers of the Great Lakes region of northern Michigan, but was extirpated in the 1930s (Hubbs and Lagler 1949, p. 44; Scott and Crossman 1973, p. 301). The second population (Arctic grayling of the upper Missouri River) inhabits watersheds in the upper Missouri River basin upstream of Great Falls, Montana. This population is the subject of our status review.

## Previous Federal Actions

We have reviewed the status of the Arctic grayling several times since 1982. Most recently, on September 8, 2010, we published a revised 12-month finding for the Arctic grayling (75 FR 54708). In that finding, we determined that fluvial (stream dwelling) and adfluvial (residing in lakes and spawning in streams) Arctic grayling of the upper

Missouri River did constitute a DPS under the Act. Therefore, we found that the upper Missouri River DPS was a listable entity under the Act, and we further found that listing the DPS was warranted but precluded by higher priority listing actions.

On May 10, 2011, we filed a multiyear work plan as part of a proposed settlement agreement with Wild Earth Guardians and others in a consolidated case in the U.S. District Court for the District of Columbia. On September 9, 2011, the Court accepted our agreement with the plaintiffs in *Endangered Species Act Section 4 Deadline Litig.*, Misc. Action No. 10–377 (EGS), MDL Docket No. 2165 (D. DC) (known as the “MDL case”), which requires the Service to submit to the **Federal Register** for publication either a proposed rule or a not-warranted finding for the Arctic grayling on or before September 30, 2014.

For additional information on the biology or previous Federal actions on the Arctic grayling, including Federal actions prior to 2010, see the September 8, 2010, revised 12-month finding (75 FR 54708).

## Request for Information

To ensure that the status review and, if warranted, our subsequent listing determination are based on the best available scientific and commercial information, and to provide an opportunity to any interested parties to provide information for consideration during the status assessment, we are requesting information concerning the Arctic grayling in the upper Missouri River system. We request information from other concerned governmental agencies, Native American tribes, the scientific community, industry, and any other interested party. Specifically, we are seeking:

(1) General information concerning the taxonomy, biology, ecology, genetics, and status of the Arctic grayling of the upper Missouri River system.

(2) Specific information on the conservation status of Arctic grayling in the upper Missouri River system, including information on distribution, abundance, and population trends.

(3) Specific information on factors that may affect the continued existence of the Arctic grayling in the upper Missouri River, which may include habitat modification or

destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors.

(4) Specific information on planned and ongoing conservation actions designed to improve Arctic grayling habitat or reduce threats to Arctic grayling in the upper Missouri River system.

(5) Habitat selection, use, and any changes or trends in the amount and distribution of Arctic grayling habitat.

(6) Habitat requirements for feeding, breeding, and sheltering, including particular physical or biological features that are essential to the conservation of Arctic grayling and where such physical or biological features are found.

(7) Whether any of these features may require special management considerations or protection.

(8) Specific areas outside the geographical area occupied by the DPS that may be essential for the conservation of the Arctic grayling in the upper Missouri River system.

(9) The possible benefits and impacts (including economic impacts) of a possible critical habitat designation for the Arctic grayling.

(10) Whether the designation of critical habitat for the Arctic grayling would be beneficial to the conservation of the Arctic grayling in the upper Missouri River system or whether the identification of specific areas as critical habitat may increase threats to the DPS or its habitat.

If you submit information, we request you support it with documentation such as data, maps, bibliographic references, methods used to gather and analyze the data, or copies of any pertinent publications, reports, or letters by knowledgeable sources. Section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or threatened species must be made “solely on the basis of the best scientific and commercial data available.”

You may submit your information concerning this status review by one of the methods listed in the **ADDRESSES** section. If you submit information that includes personal identifying information, you may request at the top of your document that we withhold this personal identifying information from public review. However, we cannot guarantee that we will be able to do so.
