DEPARTMENT OF EDUCATION

34 CFR Chapter II

Proposed Priorities, Requirements, and Definitions—Charter Schools Program (CSP) Grants for National Leadership Activities

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Proposed priorities, requirements, and definitions.

CFDA NUMBER: 84.282N.

SUMMARY: The Assistant Deputy Secretary for Innovation and Improvement proposes priorities, requirements, and definitions for CSP Grants for National Leadership Activities and may use these priorities, requirements, and definitions for a competition in fiscal year (FY) 2013 and later years. The Assistant Deputy Secretary is taking this action to ensure that projects funded with CSP Grants for National Leadership Activities address key policy issues currently facing charter schools and impact stakeholders on a national scale.

DATES: We must receive your comments on or before January 2, 2014.

ADDRESSES: Address all comments about this notice to Brian Martin, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W224, Washington, DC 20202–5970.

If you prefer to send your comments by email, use the following address: brian.martin@ed.gov. You must include the term “National Leadership Activities” in the subject line of your electronic message.

FOR FURTHER INFORMATION CONTACT: Brian Martin. Telephone: (202) 205–9085 or by email: brian.martin@ed.gov.

You may send a written communication to the Federal Register at 411 First Street, NE., Room B10600, Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Washington, DC time, Monday through Friday of each week except Federal holidays.

On request, we will accommodate individuals with disabilities who need assistance to communicate or auxiliary aid, please contact the person listed under FOR FURTHER INFORMATION CONTACT.

Proposed Priority 1—Improving Efficiency Through Economies of Scale

Background

Traditional public school districts benefit from economies of scale across multiple aspects of school operations. Compared to charter schools, traditional public schools tend to have higher student enrollment, which may result in lower average costs per student for various activities or a wider variety of available support services. For example, traditional public school districts can make mass purchases of supplies, equipment, and non-academic services, including facilities maintenance, food, data systems, insurance, and transportation services. These districts can consolidate academic services across a large number of schools, including services such as curriculum development and alignment, student assessments, and professional development for teachers and school leaders. They can consolidate services for specific student populations, such as students with disabilities or English Learners. They can provide a range of arts and athletic opportunities for their students. They have the ability, through different funding structures, sustained economies of scale, and historical relationships with colleges, universities, and nonprofit organizations, to recruit teachers and leaders more broadly, and in a more structured way, than charter schools.

Charter schools are explicitly designed to have the autonomy to employ innovative, promising...
approaches to public education. This autonomy, however, can limit charter schools’ ability to take advantage of the economies of scale available to traditional public school districts, impeding the charter school sector’s ability to improve its performance and scale up high-quality charter school models.

As the charter school sector continues to grow, there is an increasing opportunity for charter schools to form consortia to achieve the benefits of economies of scale and, thus, improve performance and increase the number of high-quality charter schools nationwide. The Department proposes this priority to support such efforts.

**Proposed Priority**

This proposed priority is for projects of national significance and scope that promote shared systems for acquiring goods or services to achieve efficiencies in the use of time, staff, money, services for special populations, or other resources for the purpose of creating and sustaining high-quality charter schools (as defined in this notice).

An applicant addressing this priority is not required to apply as part of a partnership or consortium, but must include plans for developing a consortium, or consortia of charter schools that will share systems for acquiring goods or services. The plans must include detailed descriptions (including supporting documentation) of the following:

1. The activities of the proposed consortium or consortia and demonstrate how and to what extent the activities will achieve efficiencies in the use of time, staff, money, services for special populations, or other areas related to operating high-quality charter schools;
2. Proposed members of the consortium or consortia, how the composition of this consortium or consortia contributes to achieving efficiencies, the specific activities each member will carry out, and how specific activities will include entities outside of the network that the lead applicant currently manages;
3. How proposed project activities will help create and sustain high-quality charter schools;
4. How information about the proposed project’s activities will be disseminated primarily to charter schools as the primary stakeholder group, and secondarily to other stakeholders, such as charter school support organizations and authorized public chartering agencies, as appropriate, at the charter school national level (as defined in this notice);
5. How the dissemination strategy will include assembling a community of practice (as defined in this notice) for the stakeholder group(s) served; and
6. The national significance and scope of the proposed project.

**Proposed Priority 2—Improving Accountability**

**Background**

While there are many high-performing charter schools across the nation, charter school performance varies significantly and too many persistently low-performing charter schools are not held accountable for their results. (For example, see the January 30, 2013 report from the Center for Research on Education Outcome’s entitled, “Charter School Growth and Replication”, which analyzes student performance and progress data from 25 States, and the District of Columbia, that have enacted charter school laws.)

Despite 43 distinct sets of State laws governing charter schools, and almost 1,000 different entities authorizing charter schools, there are some common promising practices that provide the degree of oversight necessary to ensure that charter schools deliver on their promises. Over the lifespan of a charter school, authorizing practices will have a direct impact on the quality of the charter school sector. Authorizers are responsible for conducting rigorous application reviews to ensure new schools are of a high quality. Once schools are open, accountability practices for charter schools need to be strengthened within States. For example, charter school renewal should occur regularly enough to ensure accountability and provide an opportunity for amendment of the charter or closure of poor-performing schools. Authorizers should have clear policies to hold schools accountable more consistently for meeting their academic, financial, and operational performance goals, as well as for complying with all applicable laws, including civil rights laws requiring equal access.

Through the development, refinement, and dissemination of authorizers’ promising practices in areas such as charter school approval, performance monitoring, charter contract renewal, and charter school closure, the Department expects authorizers to hold charter schools more accountable and to increase the number of high-quality seats available to students. These promising practices will help ensure that new charter schools have demonstrated that they are positioned to succeed, poor-performing charter schools are closed, and high-quality charter schools are replicated and expanded to serve more students.

**Proposed Priority**

This proposed priority is for projects of national significance and scope that are designed to improve authorized public chartering agencies’ capacity to conduct rigorous application reviews, monitor and oversee charter schools using data and measurable performance goals, close underperforming schools, replicate and expand high-performing schools, maintain a portfolio of high-quality charter schools, and evaluate and communicate the performance of that portfolio.

Applicants addressing this priority must provide detailed descriptions (including supporting documentation) of the following:

1. How the proposed project will improve, within a variety of communities in one or more States, authorized public chartering agencies’ capacity to:
   i. Approve only high-quality charter schools that meet the standards of a rigorous application process and review;
   ii. Monitor and oversee charter schools through the regular collection of data, including student performance and financial data, and measurable performance goals;
   iii. Identify schools eligible for renewal and those that should be closed through clear renewal and revocation criteria;
   iv. Maintain portfolios of high-quality charter schools by evaluating authorizer and portfolio performance and disseminating information on the performance of those portfolios;
2. The applicant’s prior success in improving, within a variety of communities in one or more States, authorized public chartering agencies’ capacity to:
   i. Approve only high-quality charter schools that meet the standards of a rigorous application process and review;
   ii. Monitor and oversee charter schools through the regular collection of data, including student performance and financial data, and measurable performance goals;
   iii. Identify schools eligible for renewal and those that should be closed through clear renewal and revocation criteria;
   iv. Maintain portfolios of high-quality charter schools by evaluating authorizer and portfolio performance and disseminating information on the performance of those portfolios, and help improve the ability of other
authorized public chartering agencies to produce similar results;

(3) How dissemination activities focus on authorized public chartering agencies as the primary stakeholder group, and secondarily on other stakeholders, such as charter school support organizations or charter schools, as appropriate, at the charter school national level;

(4) How the dissemination strategy will include assembling a community of practice for the stakeholder group(s) served; and

(5) The national significance and scope of the proposed project.

**Proposed Priority 3—Students With Disabilities**

**Background**

As public schools, it is essential that charter schools provide equitable access and appropriate educational services to all students, regardless of disability, as set forth in the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973 and the Department’s Section 504 regulations. A GAO report released in June, 2012 found that charter schools enrolled a lower percentage of students with disabilities than traditional public schools. This discrepancy may have many contributing factors that are likely to vary from school to school. Regardless, charter schools should have the capacity to serve all students with disabilities irrespective of severity or type of disability. The Department believes that charter schools are well-positioned to develop new approaches to meeting the needs of students with disabilities and improve educational outcomes for these students. The Department proposes a priority for projects designed to improve charter schools’ capacity, through a variety of methods, to recruit and serve students with disabilities more effectively.

**Proposed Priority**

This proposed priority is for projects designed to serve students with disabilities and increase the schools’ capacity to enroll students with disabilities, and improve student achievement, student growth, high school graduation rates, and college enrollment rates for students with disabilities.

(1) Developing strategies and tools to increase access to charter schools for students with disabilities and increase the schools’ capacity to enroll students with disabilities.

(2) Disseminating promising practices that increase access to charter schools for students with disabilities and increase the schools’ capacity to enroll students with disabilities; and improve student achievement, student growth, high school graduation rates, and college enrollment rates for students with disabilities.

**Proposed Priority 4—English Learners**

**Background**

From 2001 to 2010 the number of students identified as English Learners increased significantly, growing from approximately 3,700,000 to 4,660,275 nationwide. In 2011, the National Assessment of Educational Progress reports on mathematics, reading, and science showed a difference in scores between English Learners and non-English Learners of 49, 47, and 62 percent, respectively.2 The Department believes that charter schools are well-positioned to develop new approaches to meeting the needs of English Learners and can play an integral role in closing the achievement and attainment gaps between English Learners and their peers. The Department proposes a priority for projects designed to improve charter schools’ capacity, through a variety of methods, to recruit and serve English Learners more effectively.

**Proposed Priority**

This proposed priority is for projects of national significance and scope that are designed to improve access to charter schools for English Learners and increase the schools’ enrollment, as well as improve achievement (including student achievement and student growth) and attainment (including English proficiency, high school graduation rates, and college enrollment rates) for English Learners in charter schools, through one or more of the following activities:

(1) Developing strategies and tools to increase access to charter schools for English Learners and increase the schools’ capacity to enroll English Learners, and improve student achievement, student growth, English proficiency, high school graduation rates, and college enrollment rates for English Learners students.

(2) Disseminating promising practices that increase access to charter schools for English Learners and increase the schools’ capacity to enroll English Learners, and improve student achievement, student growth, English proficiency, high school graduation rates, and college enrollment rates for English Learners.

**Proposed Priority 5—Personalized Technology-Enabled Learning**

**Background**

Learning models that blend traditional, classroom-based teaching and learning with virtual, online, or digital delivery of personalized instructional content offer the potential to transform public education and create significant improvements in students’ achievement, growth, engagement, and non-cognitive skills. In order to achieve superior outcomes, the effective development and implementation of these models are essential.

In particular, technology-enabled learning tools must be functional, engaging, user-friendly, appropriate for students with diverse learning needs, and aligned with college-and-career-ready standards. Moreover, it is of great importance to ensure equitable access to and use of these tools and supports by high-need students.

In light of the operational autonomy that charter schools possess and the focus that many of these schools have on serving high-need students, charter schools are uniquely positioned to contribute to the development and implementation of instructional models that effectively incorporate technology-enabled personalized learning tools and supports for high-need students. The Department proposes this priority to stimulate and support such efforts.

**Proposed Priority**

This proposed priority is for projects of national significance and scope that are designed to improve achievement and attainment outcomes for high-need students through the development and implementation in charter schools of technology-enabled instructional models, tools, and supports that personalize instruction.

**Types of Priorities**

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the Federal Register. The effect of each type of priority follows:

**Absolute priority:** Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

**Competitive preference priority:** Under a competitive preference priority,
we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(iii)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(iii)).

Invitational priority: Under an invitational priority we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Proposed Requirements

The Assistant Deputy Secretary for Innovation and Improvement proposes the following requirements for this program. We may apply one or more of these requirements in any year in which this program is in effect. By requiring that applicants provide a charter school logic model supporting their projects and restricting eligibility for grants to specific types of entities, the Department will ensure that grantees have the preparation and experience to be successful with a CSP Grant for National Leadership Activities.

Proposed Application Requirements

Logic Model

An applicant for a CSP Grant for National Leadership Activities must provide a charter school logic model (as defined in this notice) supporting its project.

Eligibility

Eligible applicants include (1) State educational agencies (SEAs) in States with a State statute specifically authorizing the establishment of charter schools; (2) authorized public chartering agencies; (3) public and private nonprofit organizations with a mission that explicitly includes supporting charter schools; and (4) public and private nonprofit organizations in partnership with an SEA, authorized public chartering agency, or a public or private nonprofit organization with a mission that explicitly includes supporting charter schools. Eligible applicants may apply as a group or consortium.

Note: The Secretary invites comment on this eligibility requirement, particularly regarding whether public and private nonprofit organizations should be required to have a mission that explicitly includes supporting charter schools and the elements that should be required to confirm eligibility.

Proposed Definitions

The Assistant Deputy Secretary for Innovation and Improvement proposes the following definitions for this program. We may apply one or more of these definitions in any year in which the program is in effect.

The proposed definitions for “high-quality charter school” and “significant compliance issue” are based on the definitions in the notice of final priorities, requirements, and definitions for the CSP Replication and Expansion grant program, published in the Federal Register on July 12, 2011 (76 FR 40898). The proposed definitions for “graduation rate” and “student achievement” are identical to the definitions in the Supplemental Priorities for Discretionary Grant Programs, published in the Federal Register on December 15, 2010 (75 FR 78510), and corrected on May 12, 2011 (76 FR 27637). The proposed definitions for “student growth” and “high-need students” are based on the definitions in the Supplemental Priorities for Discretionary Grant Programs, published in the Federal Register on December 15, 2010 (75 FR 78510), and corrected on May 12, 2011 (76 FR 27637). The proposed definition for “charter school logic model” is based on the definition of “logic model” in the Direct Grant Programs and Definitions That Apply to Department Regulations Notice of Proposed Rulemaking published in the Federal Register on December 14, 2012 (77 FR 74392).

Charter school logic model means a well-specified conceptual framework that identifies key components of the proposed practice, strategy, or intervention (i.e., the active “ingredients” that are hypothesized to be critical to achieving the relevant outcomes) and describes the relationships among the key components and outcomes, theoretically and operationally.

Charter school national level means, with respect to an applicant’s dissemination strategy, that the strategy covers a wide variety of charter schools, authorized public chartering agencies, charter support organizations, and other stakeholder groups within multiple States across the country, including rural and urban areas.

Community of practice means a group of stakeholders that interacts regularly to solve a persistent problem or to improve practice in an area that is important to them and the success of the grant project.

Graduation rate means a four-year adjusted cohort graduation rate consistent with 34 CFR 200.19(b)(1) and may also include an extended-year adjusted cohort graduation rate consistent with 34 CFR 200.19(b)(1)(v) if the State in which the proposed project is implemented has been approved by the Secretary to use such a rate under Title I of the ESEA.

High-need students means children and students at risk of educational failure, such as children and students who are living in poverty, who are English Learners, who are far below grade level or who are not on track to becoming college- or career-ready by graduation, who have left school or college before receiving, respectively, a regular high school diploma or a college degree or certificate, who are at risk of not graduating with a diploma on time, who are homeless, who are in foster care, who are pregnant or parenting teenagers, who have been incarcerated, who are new immigrants, who are migrant, or who have disabilities.

High-quality charter school means a school that shows evidence of strong academic results for the past three years (or over the life of the school, if the school has been open for fewer than three years), based on the following factors:

(1) Increased student academic achievement and attainment for all students, including, as applicable, educationally disadvantaged students;

(2) Either (i) Demonstrated success in closing historic achievement gaps for the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA; or (ii) No significant achievement gaps between any of the subgroups of students described in section 1111(b)(2)(C)(v)(II) of the ESEA and significant gains in student academic achievement have been made with all populations of students served by the charter school;

(3) Achieved results (including performance on statewide tests, annual high school graduation rates, college attendance rates, and college persistence rates where applicable and available) for low-income and other educationally disadvantaged students served by the charter school; and

(4) No significant compliance issues (as defined in this notice), particularly in the areas of student safety and financial management.

Significant compliance issue means a violation that did, will, or could lead to the revocation of a school’s charter.

Student achievement means—

(a) For tested grades and subjects—

(1) A student’s score on the State’s assessments under the ESEA; and, as appropriate,
Other measures of student learning, such as those described in paragraph (b) of this definition, provided they are rigorous and comparable across schools.

(b) For non-tested grades and subjects: Alternative measures of student learning and performance, such as student scores on pre-tests and end-of-course tests; student performance on English language proficiency assessments; and other measures of student achievement that are rigorous and comparable across schools.

Student growth means the change in achievement data for an individual student between two or more points in time. Growth may also include other measures that are rigorous and comparable across classrooms.

Final Priorities, Requirements and Definitions

We will announce the final priorities, requirements, and definitions in a notice in the Federal Register. We will determine the final priorities, requirements, and definitions after considering responses to this notice and other information available to the Department. This notice does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria subject to meeting applicable rulemaking requirements.

Note: This notice does not solicit applications. In any year in which we choose to use one or more of these proposed priorities, requirements, and definitions, we invite applications through a notice in the Federal Register.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency; or

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practical—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing these proposed priorities, requirements, and definitions only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. The Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department’s programs and activities.

Paperwork Reduction Act of 1995

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This helps ensure that the public understands the Department’s collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

These proposed regulations contain information collection requirements that are approved by OMB under OMB control number 1894-0006; these proposed regulations do not affect the currently approved data collection.

We estimate that each applicant would spend approximately 176 hours of staff time to address the proposed requirements, prepare the application, and obtain necessary clearances. The total number of hours for all expected applicants is an estimated 7,040 hours. We estimate the total cost per hour of the applicant-level staff who will carry out this work to be $57 per hour. The total estimated cost for all applicants would be $401,280.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR Part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.
This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to the contact person listed under FOR FURTHER INFORMATION CONTACT.

Electronic Access to This Document: The official version of this document is the document published in the Federal Register. Free Internet access to the official edition of the Federal Register and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the Federal Register, in text or Adobe Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the Federal Register by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: November 26, 2013.

Nadya Chinoy Dabby, Associate Assistant Deputy Secretary for the Office of Innovation and Improvement, delegated the authority to perform the functions and duties of the Assistant Deputy Secretary.

BILLING CODE 4000–01–P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

[NPS–LAMR–13812; PPIMLMR50, PPMPSPD7Z.YM00000]

RIN 1024–AE12

Special Regulations, Areas of the National Park System, Lake Meredith National Recreation Area, Bicycling

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: Through the preparation of a Multi-Use Trail Environmental Assessment, the National Park Service has decided to construct an unpaved, multi-use recreational trail in Lake Meredith National Recreation Area. The multi-use trail will be approximately 22 miles in length and be open to pedestrian and bicycle use only. National Park Service regulations require promulgation of a special regulation to designate new routes for bicycle use off park roads and outside developed areas. The multi-use trail will consist of five contiguous sections constructed in five phases, as resources become available. This multi-use trail will help address the lack of land-based recreational opportunities in the region; increase the availability of interpretive resources in the recreation area; provide a firebreak at the urban-wildland interface; and improve access for emergency response personnel.

DATES: Comments must be received by February 3, 2014.

ADDRESSES: You may submit your comments, identified by Regulation Identifier Number (RIN) 1024–AE12, by any of the following methods:

• Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.
• Mail: Lake Meredith National Recreation Area, P.O. Box 1460, Fritch, TX 79036
• Hand Deliver to: Superintendent’s Office, Fritch, TX.

Instructions: All submissions received must include the agency name and docket number or RIN for this rulemaking. All comments received will be posted without change to http://www.regulations.gov, including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the “Public Participation” heading of the SUPPLEMENTARY INFORMATION section of this document.

Docket: For access to the docket to read background documents or comments received, go to http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Arlene Wimer, Chief of Resource Management, Lake Meredith National Recreation Area, at 806–857–0309 or at the address listed in the ADDRESSES section.

SUPPLEMENTARY INFORMATION:

Background

Congress established Lake Meredith National Recreation Area (LAMR or recreation area) in 1990 “to provide for public outdoor recreation use and enjoyment of the lands and waters associated with Lake Meredith in the State of Texas, and to protect the scenic, scientific, cultural, and other values contributing to the public enjoyment of such lands and waters.” Situated approximately 35 miles north of Amarillo, Texas within Potter, Moore, Hutchinson, and Carson counties, LAMR is approximately 45,000 acres in size and is the largest public landmass in the Texas Panhandle.

Purpose of Multi-Use Trail

Recreational Opportunities

LAMR provides water-based public recreational opportunities such as fishing, boating, water skiing, and swimming. However, dropping water levels have caused a substantial loss of public access to the lake and a corresponding reduction in water-based recreational opportunities. Visitation to the recreation area has declined over the last 10 years, and lower water levels and reduced access could be a contributing factor to this decline in use. Water levels are not expected to increase in the near future, and the addition of a multi-use trail could provide visitors with an alternative, land-based form of recreation which may attract more visitors to LAMR.

LAMR provides some land-based recreational opportunities, such as hiking, horseback riding, hunting, off-road vehicle use, and camping. Over the past several years, bicycling has become more popular in the Texas Panhandle, as evidenced by increased bike use at nearby Palo Duro Canyon State Park. A multi-use trail at LAMR will help address the increasing demand for bike trails in the Texas Panhandle. The multi-use trail will also provide additional hiking opportunities on the trail, and primitive camping opportunities in Turkey Creek Canyon.

Interpretive Resources

LAMR contains natural and cultural resources that are unique to the region. The natural and geologic resources of the recreation area have enabled human survival, subsistence, and adaptation that have resulted in a continuum of human presence in the area for more than 13,000 years. Cultural sites in LAMR and the adjacent Alibates Flint Quarries National Monument offer views of lifeways in cultural periods from the Paleo Indians (9,500 BC–6,000 BC) to the present day. The exposed geologic features on the walls of the Canadian River valley (i.e. the “breaks”) reveal active geologic processes that are easily visible to an extent not present elsewhere in the region. The topography and geography of the Canadian River breaks create a divergence from the surrounding landscape that offers scenic values and opportunities not found elsewhere in the region.

Despite these extraordinary resources, LAMR lacks interpretive facilities to allow visitors to fully understand and
