SUPPLEMENTARY INFORMATION:

Background

As amended by a final rule published in today's **Federal Register** (see "Bovine Spongiform Encephalopathy; Importation of Bovines and Bovine Products," Docket No. APHIS-2008-0010), the regulations in 9 CFR part 92 subpart B, "Importation of Animals and Animal Products; Procedures for Requesting BSE Risk Status Classification With Regard To Bovines" (referred to below as the regulations), set forth the process by which the Animal and Plant Health Inspection Service (APHIS) classifies regions for bovine spongiform encephalopathy (BSE) risk. Section 92.5 of the regulations provides that all countries of the world are

considered by APHIS to be in one of three BSE risk categories: Negligible risk, controlled risk, or undetermined risk. These risk categories are defined in § 92.1. Any region that is not classified by APHIS as presenting either negligible risk or controlled risk for BSE is considered to present an undetermined risk. The list of those regions classified by APHIS as having either negligible risk or controlled risk can be accessed on the APHIS Web site at http://www.aphis.usda.gov/import_export/animals/animal_disease_status.shtml. The list can also be obtained by writing to APHIS at National Import Export Services, 4700 River Road Unit 38, Riverdale, MD 20737.

Under the regulations, APHIS may classify a region for BSE in one of two ways. One way is for countries that have not received a risk classification from the World Organization for Animal Health (OIE) to request classification by APHIS. The other way is for APHIS to concur with the classification given to a country by the OIE.

If the OIE has classified a country as either BSE negligible risk or BSE controlled risk, APHIS will seek information to support concurrence with the OIE classification. This information may be publicly available information, or APHIS may request that countries supply the same information given to the OIE. APHIS will announce in the **Federal Register**, subject to public comment, its intent to concur with an OIE classification.

In accordance with this process, we are giving notice in this document that APHIS intends to concur with the OIE risk classifications of the following countries:

- *Regions of negligible risk for BSE:*

Austria, Belgium, Brazil, Colombia, Israel, Italy, Japan, the Netherlands, Singapore, Slovenia.

- *Regions of controlled risk for BSE:*

Bulgaria, Costa Rica, Croatia, Nicaragua, Taiwan.

The OIE recommendations regarding each of the above countries can be viewed at <http://www.oie.int/animal-health-in-the-world/official-disease-status/bse/list-of-bse-risk-status/>.
