

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA has initiated a proceeding to investigate whether and what type of regulatory action might be appropriate to control exposures to lead dust resulting from renovation, repair, and painting (RRP) activities in public and commercial buildings (PnCBs). These proceedings have been described in previous **Federal Register** documents, entitled "Lead; Renovation, Repair, and Painting Program for Public and Commercial Buildings" (advance notice of proposed rulemaking) (75 FR 24848, May 6, 2010) (FRL-8823-6); "Lead; Renovation, Repair, and Painting Program for Public and Commercial Buildings; Request for Information and Advance Notice of Public Meeting" (77 FR 76996, December 31, 2012) (FRL-9373-7); and "Lead; Renovation, Repair, and Painting Program for Public and Commercial Buildings; Notice of Public Meeting and Reopening of Comment Period" (78 FR 27906, May 13, 2013) (FRL-9385-6).

EPA plans to conduct a survey to collect information on: Building and activity patterns that may affect exposures to lead dust from RRP activities in PnCBs; the number of firms that perform RRP activities in PnCBs; the types and numbers of RRP activities that are performed; the extent to which various work practices are currently being used in RRP jobs in PnCBs; and the extent to which various work practices that help with the containment and cleanup of lead dust are currently being used in RRP jobs performed in PnCBs.

The information collected through the survey (along with information submitted to EPA in response to the previous **Federal Register** documents for this proceeding, as well as other data sources) will allow EPA to predict a baseline for the incidence of different types of RRP activities that disturb lead-based paint in PnCBs, the methods that are used to conduct these activities, the work practices that are used to contain

and clean the resulting dust, and the characteristics of the buildings where the work is performed. EPA will use this information to estimate the resulting exposures to lead dust, which will inform Agency decisionmaking about the need for and scope of potential regulatory or other actions to reduce exposures to lead dust from RRP activities in PnCBs. If EPA determines that a regulation is needed, the Agency will use this data to assess the incremental benefits and costs of potential options to reduce such exposures. The information collected through the survey is necessary to inform Agency decisionmakers about the need for and scope of regulatory or other actions to protect against risks created by RRP activities disturbing lead-based paint in PnCBs.

The information collection will be a one-time data collection. Participation will be voluntary. Establishments will be selected using a stratified random sampling method. EPA plans to have a total of 402 respondents complete a questionnaire. The information collection will utilize separate questionnaires for contractors that perform RRP activities in PnCBs; lessors and managers of PnCBs that use their own staff to perform RRP activities; and building owners and occupants of PnCBs that use their own staff to perform RRP activities. The survey asks for readily available information, e.g., information known or easily accessible by respondents.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 3 minutes per response for the screening portion of the survey, 30 minutes for the contractor questionnaire, 5 minutes for the property lessor/manager questionnaire, and 5 minutes for the building owner/occupant questionnaire. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are RRP contractors that work in PnCBs, lessors and managers of PnCBs, and owners and occupants of PnCBs.

Estimated total number of potential respondents: 402.

Frequency of response: One occasion (one time).

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 672 hours.

Estimated total annual costs: \$ 39,191. This includes an estimated burden cost of \$ 39,191 and an estimated cost of \$ 0 for capital investment or maintenance and operational costs.

III. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Title: State Review Framework.

ICR numbers: EPA ICR No. 2185.05, OMB Control No. 2020-0031.

ICR status: This ICR is scheduled to expire on December 31, 2013. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR Part 9.

Abstract: The State Review Framework ("Framework") is an oversight tool designed to assess state performance in enforcement and compliance assurance. The Framework's goal is to evaluate state performance by examining existing data to provide a consistent level of oversight and develop a uniform mechanism by which EPA Regions, working collaboratively with their states, can ensure that state environmental agencies are consistently implementing the national compliance and enforcement program in order to meet agreed-upon goals. Furthermore, the Framework is designed to foster
