ACTION: 30-day notice of submission of information collection approval from the Office of Management and Budget (OMB) and request for comments.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions,
but are not statistical surveys that yield quantitative results that can be
generalized to the population of study. This feedback will provide insights into
customer or stakeholder perceptions, experiences and expectations, provide
an early warning of issues with service, or focus attention on areas where
communication, training or changes in operations might improve delivery of
products or services. These collections will allow for ongoing, collaborative and
actionable communications between the Agency and its customers and
stakeholders. It will also allow feedback to contribute directly to the
improvement of program management.

Feedback collected under this generic
clearance will provide useful
information, but it will not yield data
that can be generalized to the overall
population. This type of generic
clearance for qualitative information
will not be used for quantitative
information collections that are
designed to yield reliably actionable
results, such as monitoring trends over
time or documenting program
performance. Such data uses require
more rigorous designs that address: The
target population to which
generalizations will be made, the
sampling frame, the sample design
(including stratification and clustering),
the precision requirements or power
calculations that justify the proposed
taxe size, the expected response rate,
methods for assessing potential non-
response bias, the protocols for data
collection, and any testing procedures
that were or will be undertaken prior
to fielding the study. Depending on the
degree of influence the results are likely to
have, such collections may still be
eligible for submission for other generic
mechanisms that are designed to yield quantitative results.
