SUPPLEMENTARY INFORMATION:

I. Abstract

This survey is designed to elicit information about the public's perspectives on attitudes towards and beliefs about jaguars in the Northwestern Recovery Unit (southern Arizona and southwestern New Mexico). We plan to survey 200 residents, land-based business owners/operators, related government agency personnel, and local wildlife association and/or conservation organization members in the Northwestern Recovery Unit. The survey will gather information on people's current level of knowledge about jaguar ecology and status, people's attitudes towards jaguars, and the social barriers and opportunities to jaguar conservation in this region. The surveys will be in-person interviews. This information will aid us in identifying groups that might be interested in being involved or staying informed about jaguar conservation and highlighting groups with particular concerns that might be addressed in forthcoming policies or programs. We will use information gained from this survey to formulate future jaguar conservation strategies as well as to create educational and outreach materials for jaguar recovery.
