Following the passage of the Telecommunications Act of 1996, the Commission adopted interstate access charge and universal service support reforms. The reforms were designed to establish a "pro-competitive, deregulatory national policy framework" for the United States telecommunications industry, and to carry out the universal service policies embodied in the 1996 Act. Specifically, the Commission aligned the interstate access rate structure more closely with the manner in which costs are incurred, and created a universal service support mechanism for rate-of-return carriers (Interstate Common Line Support (ICLS)) to replace implicit support in interstate access charges with explicit support that is portable to all eligible

telecommunications carriers. The Commission's actions were also tailored to the needs of small and mid-sized local telephone companies serving rural and high-cost areas, and help to provide certainty and stability for rate-of-return carriers, encourage investment in rural America, and provide important consumer benefits. To administer the ICLS mechanism, the Administrator must collect certain data. Specifically, the Administrator must collect from each rate-of-return carrier projected cost and revenue data for the July 1-June 30 funding year to accurately distribute prospective ICLS to those carriers. Line count data is reported on FCC Form 507. Projected cost data, including cost and revenue data is filed on FCC Form 508. And, the actual data, including cost and revenue data is reported on FCC Form 509.

Number of Respondents and Responses: 5,907 respondents; 573,767 responses.

(The respondents are now more likely to be using advanced IT software, automation, and standardized business practices to respond to a request for the sharing of directory listings, which accounts for their ability to provide a greater number of responses each year with a reduced incremental burden.)

Estimated Time per Response: 1 hour to 547,500 hours.

Frequency of Response: Annual, on occasion, and one time reporting requirements, recordkeeping requirement, and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 153, 154, 201, 222 and 251.

The Commission is not requesting respondents to submit confidential information to the Commission. If the Commission requests that carriers or providers submit information which they believe is confidential, the carriers or providers may request confidential treatment of their information under 47 CFR Section 0.459 of the Commission's rules.

Needs and Uses: In April 1996, the Commission issued a *Notice of Proposed Rulemaking (NPRM)* concerning certain provisions in the Telecommunications Act of 1996 ("the Act"), including section 251. Section 251 is designed to accelerate private sector development and deployment of telecommunications technologies and services by spurring competition. The Commission adopted rules and regulations designed to implement certain provisions of section 251, and to eliminate operational barriers to competition in the telecommunications services markets.

OMB Control Number: 3060-0823.

Title: Part 64, Pay Telephone Reclassification.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 400 respondents; 16,820 responses.

Estimated Time per Response: 2.66 hours (average).

Frequency of Response: On occasion, quarterly and monthly reporting requirements and third party disclosure requirements.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154, 201-205, 218, 226 and 276.

Total Annual Burden: 44,700 hours.

Total Annual Cost: \$652,000.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality:

Confidentiality concerns are not relevant to these types of disclosures. The Commission is not requesting carriers or providers to submit confidential information to the Commission. If the Commission requests that carriers or providers submit information which they believe is confidential, the carriers or providers may request confidential treatment of their information under 47 CFR Section 0.459 of the Commission's rules.

Needs and Uses: The Commission established a plan to ensure that

payphone service providers (PSPs) were compensated for certain non-coin calls originated from their payphones. As part of this plan, the Commission required that by October 7, 1997, local exchange carriers were to provide payphone-specific coding digits to PSPs, and that PSPs were to provide those digits from their payphones to interexchange carriers. The provision of payphone-specific coding digits was a prerequisite to payphone per-call compensation payments by IXCs to PSPs for subscriber 800 and access code calls. The Commission's Wireline Competition Bureau subsequently provided a waiver until March 9, 1998, for those payphones for which the necessary coding digits were not provided to identify calls. The Bureau also on that date clarified the requirements established in the Payphone Orders for the provision of payphone-specific coding digits and for tariffs that LECs must file pursuant to the Payphone Orders.
