

Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202-402-3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of proposed collection of information; (3) Enhance the quality,

utility, and clarity of the information to be collected and (4) Minimize the burden of collection of information on those who are to respond; including the use of appropriate automated collection techniques or other forms of technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

A. Overview of Information Collection

Title of Information Collection: Congressional Earmark Grants.

OMB Approval Number: 2506-0179.

Type of Request (i.e. new, revision or extension of currently approved collection): extension of a currently approved collection.

Form Number: SF-424; SF-LLL; SF-1199A; HUD-27054; SF-425; HUD 27053, HUD-27056.

Description of the need for the information and proposed use: HUD's Congressional Grants Division and its Environmental Officers in the field use this information to make funds available to entities directed to receive funds appropriated by Congress. This information is used to collect, receive, review and monitor program activities

through applications, semi-annual reports, and close out reports. The information that is collected is used to assess performance. Grantees are units of state and local government, nonprofits and Indian tribes.

Respondents are initially identified by congress and generally fall into two categories: Economic Development Initiative—Special Project (EDI-SP) grantees and Neighborhood Initiative (NI) grantees. The agency has used the application, semi-annual reports and close out reports to track grantee performance in the implementation of approved projects.

Respondents (i.e. affected public): local and state governments, nonprofits and Indian tribes.

Estimated Number of Respondents: 1400.

Estimated Number of Responses: 2800.

Frequency of Response: 2.

Average Hours per Response: .5.

Total Estimated Burdens: 1400.

Note: Preparer of this notice may substitute the chart for everything beginning with estimated number of respondents above:

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
	1400	2	2800	.5	1400	33.50	\$46,900
Total

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: December 27, 2013.

Mark Johnston,

Deputy Assistant Secretary for Special Needs Program.

Endangered and Threatened Wildlife and Plants; Final Recovery Plan for the Gulf Coast Jaguarundi

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of our final recovery plan for the Gulf Coast jaguarundi under the Endangered Species Act of 1973, as amended (Act). We have developed this final recovery plan to comply with a

September 16, 2010, Stipulated Settlement Agreement between WildEarth Guardians and the Secretary of the Interior. This species historically occurred in southern Texas in the United States, and is currently known to occur in eastern Mexico as far south as Veracruz.

ADDRESSES: If you wish to review the final recovery plan, you may obtain a copy by any one of the following methods:

- *Internet:* <http://www.fws.gov/endangered/species/recovery-plans.html>;
- *U.S. mail:* South Texas Refuges Complex Headquarters, Attn: Mitch Sternberg, 3325 Green Jay Road, Alamo, TX 78516;
- *Telephone:* (956) 784-7500;
- *Fax:* (956) 787-8338; or
- *Email:* Mitch_Sternberg@fws.gov.

FOR FURTHER INFORMATION CONTACT:

Mitch Sternberg, at the above address, phone number, or email.

SUPPLEMENTARY INFORMATION: We announce the availability of our final recovery plan for the Gulf Coast jaguarundi (*Puma yagouaroundi*

cacomitli). The recovery plan was prepared by biologists from the United States, with input from experts in Mexico. We made the draft recovery plan available via a **Federal Register** notice published on December 26, 2012 (77 FR 76066); this notice opened a comment period that ran through February 22, 2013, and requested comments from local, State, and Federal agencies; and the public. We considered information we received from these entities, as well as that obtained from two independent peer reviewers, in finalizing this revised recovery plan.

Background

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Act (16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer appropriate under the criteria set out in section 4(a)(1) of the Act. The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

Species' History

We listed the Gulf Coast jaguarundi as an endangered species under the Act on June 14, 1976 (41 FR 24062). The Listed Cats of Texas and Arizona Recovery Plan (With Emphasis on the Ocelot) was completed in 1990, and it briefly addressed the jaguar, jaguarundi, and margay, but focused on the ocelot, primarily in Texas. The Final Gulf Coast Jaguarundi Recovery Plan only applies to the Gulf Coast subspecies of jaguarundi.

The jaguarundi was originally included in the genus *Felis*, and the Gulf Coast jaguarundi was originally listed under the Act as *Felis yagouaroundi cacomitli* in 1976. Later, genus classification was changed from *Felis* to *Herpailurus*, and this widely accepted change was subsequently made to the listing. Thus, this subspecies is currently listed under the Act as *Herpailurus* (=*Felis*) *yagouaroundi cacomitli*. However, more recent genetic work assigns the jaguarundi to the genus *Puma*, and this has become the generally accepted nomenclature. Therefore, in keeping with this current information, we refer to the Gulf Coast jaguarundi subspecies as *Puma yagouaroundi cacomitli* throughout this recovery plan, and we officially accept the new scientific name of the jaguarundi as *Puma yagouaroundi*.

The Sinaloan jaguarundi (*Puma yagouaroundi tolteca*) was originally listed under the Act at the same time as the Gulf Coast subspecies. Because all of the current information indicates that the *tolteca* subspecies occurs entirely outside the United States and has never been confirmed within the United States, the Sinaloan jaguarundi was exempted from recovery planning on June 7, 2011.

The Gulf Coast jaguarundi is found in the Tamaulipan Biotic Province of northeast Mexico and south Texas. Within Mexico it occurs in the eastern lowlands and has not been recorded in the Central Highlands. In southern Texas, jaguarundis used dense thorny shrublands. Jaguarundis will use bunchgrass pastures if dense brush or woody cover is nearby.

The primary known threats to the Gulf Coast jaguarundi are habitat destruction, degradation, and fragmentation associated with agriculture and urbanization, and, to some extent, border security activities. Mortality from collisions with vehicles is also a threat.

Recovery Plan Goals

The objective of an agency recovery plan is to provide a framework for the recovery of a species so that protection under the Act is no longer necessary. A recovery plan includes scientific information about the species and provides criteria and actions necessary for us to be able to reclassify the species to threatened status or remove it from the Federal List of Endangered and Threatened Wildlife and Plants (List). Recovery plans help guide our recovery efforts by describing actions we consider necessary for the species' conservation, and by estimating time and costs for implementing needed recovery measures. To achieve its goals, this final recovery plan identifies the following objectives:

- Support efforts to develop more effective survey techniques for jaguarundis and to ascertain the status, better understand ecological and conservation needs, and promote conservation of the Gulf Coast jaguarundi and its habitats.
- Assess, protect, and restore sufficient habitat and connectivity to support viable populations and genetic exchange of the Gulf Coast jaguarundi in southern Texas and in Mexico.
- Reduce the effects of human population growth and development on potential Gulf Coast jaguarundi habitat in the United States and on the jaguarundi's potential survival and mortality.

- Assure the long-term viability of jaguarundi conservation through partnerships, the development and application of incentives for landowners, application of existing regulations, and public education and outreach.

- Practice adaptive management, in which recovery is monitored and recovery tasks are revised by the FWS as new information becomes available.

The draft revised recovery plan contains recovery criteria based on maintaining and increasing population numbers and habitat quality and quantity. The revised recovery plan focuses on protecting populations, managing threats, maintaining habitat, monitoring progress, and building partnerships to facilitate recovery.

As the subspecies meets recovery criteria, we will review the subspecies' status and consider removal from the List.

Authority

We developed our final recovery plan under the authority of section 4(f) of the Act, 16 U.S.C. 1533(f). We publish this notice under section 4(f) Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: December 20, 2013.

Joy E. Nicholopoulos,

Acting Regional Director, Southwest Region, U.S. Fish and Wildlife Service.
