

fenced area of an existing substation, switching station, or within the boundaries of an existing electric generating facility site.

A.15: Testing or monitoring work (e.g., soil or rock core sampling, monitoring wells, air monitoring).

A.16: Studies and engineering undertaken to define proposed actions or alternatives sufficiently so that environmental effects can be assessed.

A.17: Rebuilding of power lines or telecommunications cables where road or highway reconstruction requires the applicant to relocate the lines either within or adjacent to the new road or highway easement or right-of-way.

A.18: Phase or voltage conversions, reconducting or upgrading of existing electric distribution lines, or telecommunication facilities.

A.19: Construction of standby diesel electric generators (one megawatt or less total capacity) and associated facilities, for the primary purpose of providing emergency power, at an existing applicant headquarters or district office, telecommunications switching or multiplexing site, or at an industrial, commercial, or agricultural facility served by the applicant.

Appendix D

Extraordinary Circumstances

Extraordinary circumstances that preclude the use of a CE include:

(a) Reasonable likelihood of significant impact on public health or safety.

(b) Reasonable likelihood of significant environmental effects (direct, indirect, and cumulative).

(c) Reasonable likelihood of effects on the environment that are highly uncertain, unique, or are scientifically controversial.

(d) Reasonable likelihood of violating any federal, state, or local law or requirements imposed for the protection of the environment.

(e) Reasonable likelihood of adversely affecting "environmentally sensitive" resources, unless the impact has been resolved through another environmental process (e.g., CZMA, NHPA, CWA).

Environmentally sensitive resources include:

1. Proposed federally listed, threatened, or endangered species or their designated critical habitat.

2. Properties listed or eligible for listing on the National Register of Historic Places.

3. Areas having special designation or recognition such as prime or unique or agricultural lands; designated wilderness or wilderness study areas; wild and scenic rivers; National Historic Landmarks (designated by the Secretary of the Interior); 100-year floodplains; wetlands; sole source aquifers (potential sources of drinking water); National Wildlife Refuges; National Parks; areas of critical environmental concern; or other areas of high environmental sensitivity.

(f) Reasonable likelihood of adversely impacting water quality, sole source aquifers, public water supply systems or state, local, or tribal water quality standards established under the Clean Water Act and the Safe Drinking Water Act.

(g) Reasonable likelihood of effects on the quality of the environment that is highly controversial on environmental grounds. The term "controversial" means a substantial dispute exists as to the size, nature, or effect of the proposed action rather than to the existence of opposition to a proposed action, the effect of which is relatively undisputed.

(h) Reasonable likelihood of a disproportionately high and adverse effect on low income or minority populations (see E.O. No. 12898).

(i) Limited access to and ceremonial use of Indian sacred sites on Federal lands by Indian religious practitioners or significantly adversely affect the physical integrity of such sacred sites.

(j) A greater scope or size than is normal for this category of action.

(k) Reasonable likelihood of degrading already existing poor environmental conditions. Also, initiation of a degrading influence, activity, or effect in areas not already significantly modified from their natural condition.

(l) Introduction or employment of unproven technology.
