SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we continue the CCP process at Camas NWR. We started this process through a notice in the **Federal Register** (75 FR 57053; September 17, 2010).

The Camas Refuge was established by President Franklin D. Roosevelt in 1937 for the purpose of serving as a refuge and breeding ground for migratory birds and other wildlife. The Refuge is located 36 miles north of Idaho Falls, near the community of Hamer, Idaho. The Refuge lies in the upper Snake River plain at approximately 4,800 feet in elevation.

About half of the Refuge's 10,578 acres are lakes, ponds, and marshlands, with the remainder consisting of sagebrush-steppe and semi-desert grassland uplands and meadows. There are 292 known species of wildlife that utilize the Refuge during various periods of the year. Approximately 100 species of migratory birds nest at the Refuge, and it is especially important to migrating land birds. A large number of songbirds use the Refuge's cottonwood groves, which are also a significant winter roost site for bald eagles. Greater sandhill cranes gather on the Refuge prior to fall migration. Sage grouse use the Refuge during brood rearing. During migration, which peaks during March and April, and again in October, up to 50,000 ducks, 3,000 geese, and several hundred tundra and trumpeter swans may be present on the Refuge. The Refuge also hosts elk, white-tailed deer, mule deer, pronghorn, and moose.

Background

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Refuge Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, such as the National Environmental Policy Act, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify compatible wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will

review and update the CCP at least every 15 years in accordance with the Refuge Administration Act.

CCP Alternatives We Are Considering

During the public scoping process, we, along with other governmental agencies, Tribes, and the public, raised several issues which our Draft CCP/EA addresses. To address these issues, we developed and evaluated the following alternatives, summarized below:

Alternative 1 (No-Action)

This alternative represents current management.

Wildlife and Habitat: Under Alternative 1, the Refuge would continue to be managed to provide consistent deep wetland habitats April through October to support reliable levels of annual waterfowl production. Providing hemi-marsh habitat (habitat with approximately equal areas of emergent vegetation and open water) would continue to be the primary management emphasis. Camas Creek would remain highly altered (diked and incised), and minimal overbank flooding would occur. Management of upland habitats (sagebrush steppe and grasslands) would be minimal (mostly invasive species control and monitoring). Shelterbelt habitats would continue to be irrigated. Tall, mature cottonwoods nearing the end of their life spans would be replaced, and non-native understory trees and shrubs would be replaced with native species.

One hundred forty acres of alfalfa and 20 acres of small grain would be grown annually under cooperative farming agreements. Three hundred thirty acres of formerly farmed fields would be flood irrigated annually, and 150 acres of these fields would be hayed annually by cooperative farmers.

Public Use: The Refuge would maintain existing public use facilities, including a parking lot and information kiosk, 0.5-mile pedestrian birding trail and viewing platform, 6.3-mile auto tour road, and 6.5 miles of hunter access roads. Year-round hiking, biking, jogging, cross-country skiing, and/or snowshoeing would be allowed on approximately 27 miles of unimproved service roads. Off-road hiking would be permitted throughout the Refuge from July 15 through February 28. Approximately 24 percent (2,510 acres) of Camas NWR would be open to hunting of migratory game birds (ducks, geese, mergansers, American coots, and Wilson's snipe) and upland game birds (ring-necked pheasants, gray partridge, and sage-grouse) during the State seasons.
