BILLING CODE 4510-26-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-025 and 52-026; NRC-2008-0252]

Vogtle Electric Generating Station, Units 3 and 4; Southern Nuclear Operating Company; Liquid Radwaste Consistency Changes

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 16 to Combined Licenses (COL), NPF-91 and NPF-92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and the City of Dalton, Georgia (the licensee) for construction and operation of the Vogtle Electric Generating Plant (VEGP), Units 3 and 4, located in Burke County, Georgia. The amendment changes the VEGP Tier 1 (COL Appendix C) Figure 2.3.10-1, Liquid Radwaste System (WLS), and Updated Final Safety Analysis Report (UFSAR) Tier 2 tables, text and figures to align VEGP Tier 1 with Tier 2 information provided in the

UFSAR and to achieve consistency within VEGP Tier 1 material by (1) changing the safety classification of the Passive Core Cooling System (PXS) and Chemical and Volume Control System (CVS) compartment drain hubs, (2) changing the connection type from the PXS Compartments drains A and B to a header to match the design description, (3) changing the valve types for three valves in the Tier 1 figure to conform to the design description and (4) changing depiction of Tier 1 WLS components to conform to Tier 1 Figure Conventions.

The granting of the exemption allows the changes to Tier 1 information asked for in the license amendment request. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, "Scope and Contents," of Appendix D, "Design Certification Rule for the AP1000," to part 52 of Title 10 of the *Code of Federal Regulations* (10 CFR) and issuing License Amendment No. 16 to COLs, NPF-91 and NPF-92, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," Appendix D to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought changes to the VEGP Tier 1 (COL Appendix C) Figure 2.3.10-1, Liquid Radwaste System (WLS), and UFSAR Tier 2 tables, text and figures to align VEGP Tier 1 with Tier 2 information provided in the UFSAR and to achieve consistency within VEGP Tier 1 material by (1) changing the safety classification of the PXS and CVS compartment drain hubs, (2) changing the connection type from the PXS Compartments drains A and B to a header to match the design description, (3) changing the valve types for three valves in the Tier 1 figure to conform to the design description and (4) changing depiction of Tier 1 WLS components to conform to Tier 1 Figure Conventions.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4, Appendix D to 10 CFR Part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML13308A013.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for Vogtle Units 3 and 4 (COLs NPF-91 and NPF-92); these documents can be found in ADAMS under
