

on November 29, 2013. The medical device is currently undergoing regulatory review before the FDA for permission to market or use the product commercially.

Review of the application indicates that, except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156, and that the patent should be extended for one year as required by 35 U.S.C. 156(d)(5)(B). Because the regulatory review period will continue beyond the original expiration date of the patent, January 14, 2014, interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. 5,593,823 is granted for a period of one year from the original expiration date of the patent.

Dated: January 10, 2014.

Andrew Hirshfeld,

Deputy Commissioner for Patent Examination Policy, United States Patent and Trademark Office.

Title of Collection: Evaluation of a District Wide Implementation of a Professional Learning Community Initiative.

OMB Control Number: 1850-NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 403.

Total Estimated Number of Annual Burden Hours: 214.

Abstract: This study aims to address the need for systematic information about district-wide implementation of professional learning communities

(PLCs) as a critical element in improving teacher quality and instruction, thereby contributing to increased student achievement. The study will survey (online) a population of teacher participants in school-based PLCs and interview principals face to face about the context and their perceptions of the initiative, pre- and post-implementation. Data collection from teachers will focus on what the PLCs do, how they operate, and to what extent they produce the outcomes expected of them as framed by six conceptual attributes of PLCs and five specific tasks. Data collection from principals will focus on contextual information about school culture and conditions such as resources that support implementation. Teachers and principals will also provide their reflections on the challenges of implementing PLCs and their suggestions for improvement. The analysis will enable comparisons among PLCs within and across schools. Study findings are expected to inform both theory and practice related to implementation of professional learning communities.
