SUPPLEMENTARY INFORMATION:

The purpose of the Universal Cotton Standards Advisory Committee is to consider any necessary changes to the Universal Cotton Standards and to review and approve freshly prepared sets of the Universal Cotton Grade Standards for conformity with the existing standards.

At the Universal Cotton Standards Conference on June 19-21, 2013, the Advisory Committee recommended revising the Universal Cotton Standards Agreement in regards to its recommendations of adopting a Universal HVI Cotton Trash Standard and changing the frequency of Universal Cotton Standards Conferences from once every three years to once every four years.

The Universal Cotton Standards Agreement is an Agreement between USDA, the U.S. cotton industry and overseas cotton associations of merchants and textile manufacturers that provides for the trading of U.S. cotton on the official standards of the U.S. for Upland cotton. Adoption of the Universal HVI Cotton Trash Standard will ensure that the USDA's cotton trash measurement serves as the internationally accepted universal language for cotton trash measurements. Adoption of the frequency of Universal Cotton Standards Conferences to be held once every four years will provide improved cost efficiency while continuing to provide the necessary

framework for future considerations to the Universal Cotton Standards.

SUPPLEMENTARY INFORMATION:

Title: Negative Quality Control Review Schedule.

OMB Number: 0584-0034.

Form Number: FNS-245.

Expiration Date: December 31, 2016.

Type of Request: Revision of a currently approved collection.

Form FNS-245, Negative Case Action Review Schedule:

Abstract: Form FNS-245, Negative Case Action Review Schedule, is designed to collect quality control (QC) data and serve as the data entry form for Negative case action QC reviews in the Supplemental Nutrition Assistance Program (SNAP). New QC procedures for Negative cases (now referred to as Case and Procedural cases) went into effect for the 2012 QC review year. State agencies complete form FNS-245 for each Negative Case in their QC sample. SNAP has determined the form associated with the reporting of these cases needs to be updated to reflect the new name and reorganized in order to not only streamline the data elements being reported, but to also add nine data elements to more effectively and efficiently record what is now being reviewed. By streamlining the form's elements to make it more efficient, the additional elements are not expected to increase the collection's burden on State Agencies using the form. We are also requesting to rename this information collection from "Negative QC Review Schedule" to "Case and Procedural Quality Control Review Schedule".

The reporting and recordkeeping burden associated with the completion of form FNS-245, has decreased from approximately 177,351 hours to 121,784.1602 hours. The decrease in total burden is largely a result of the

decrease in total SNAP Negative case selection from 59,831 cases in FY2010 to 41,085 Case and Procedural cases in FY 2012.

Affected Public: State, Local & Tribal Governments.

Number of Respondents: 53 State Agencies.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: South Pacific Tuna Act.
OMB Control Number: 0648-0218.
Form Number(s): NA.
Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 41.
Average Hours per Response: Expressions of interest in the fishery: initial, 2 hours; renewal, 15 minutes; license applications, 1 hour; vessel monitoring system (VMS) registration, 45 minutes; catch report forms, 1 hour; unloading logsheets, 30 minutes.
Burden Hours: 402.

Needs and Uses: This request is for extension of a current information collection.
 The National Oceanic and Atmospheric Administration (NOAA) collects vessel license, vessel registration, catch, and unloading information from operators of United States (U.S.) purse seine vessels fishing within a large region of the western and central Pacific Ocean, which is governed by the Treaty on Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America. The Treaty, along with its annexes, schedules and implementing agreements, was signed in Port Moresby, Papua New Guinea, in 1987. This collection of information is required to meet U.S. obligations under the Treaty.
 The Treaty authorizes United States (U.S.) tuna vessels to fish within fishing zones of a large region of the Pacific Ocean. The South Pacific Tuna Act of 1988 (16 U.S.C. 973-973r) and U.S. implementing regulations (50 CFR Part 300, Subpart D) authorize the collection of information from participants in the Treaty fishery. Vessel operators who wish to participate in the Treaty Fishery must submit annual vessel license and registration (including registration of VMS) units) applications and periodic written reports of catch and unloading of fish from licensed vessels. They are also required to ensure the continued operation of VMS units on board licensed vessels, which is expected to require periodic maintenance of the
