BILLING CODE 8011-01-P

DEPARTMENT OF STATE

[Public Notice 8598]

Applications: NuStar Logistics, LP; Presidential Permit

AGENCY: Department of State.

ACTION: Notice of Receipt of an Application by NuStar Logistics, L.P., for Issuance of a Presidential Permit To Connect, Operate and Maintain Existing Pipeline Facilities on the Border of the United States and Mexico.

SUMMARY: Notice is hereby given that the Department of State (Department) has received from NuStar Logistics, L.P. ("NuStar") an application to amend the 2003 Presidential Permit issued to Valero Logistics Operations L.P. to construct, connect, operate, and maintain pipeline facilities (the "Dos Laredos Pipeline") crossing the international border between the United States and Mexico at a location on the Rio Grande river known as "la Bota",

approximately six miles northwest of downtown Laredo, Texas. The application indicates that Valero Logistics Operations, L.P. has changed its name to NuStar Logistics, L.P., and requests that the amended permit reflect the partnership's current name. While the 2003 Presidential Permit only authorized the transportation of liquefied petroleum gas ("LPG"), NuStar seeks an amendment now to authorize the transport of LPG and petroleum products, including diesel.

NuStar Logistics, L.P., a Delaware limited partnership, is a subsidiary of NuStar Energy L.P., a publicly traded, limited partnership based in San Antonio, Texas.

The Dos Laredos Pipeline is an 8 5/8 inch outer diameter pipeline that connects the NuStar terminal in Laredo, Texas, with a terminal in Nuevo Laredo, Tamaulipas, Mexico. The U.S. portion of Dos Laredos Pipeline consists of approximately 10.6 miles of pipeline from the NuStar terminal in Laredo, Texas to a location on the Rio Grande known as "La Bota," approximately 6 miles northwest of Laredo.

The 2003 Presidential Permit permits the transportation of LPG. NuStar now requests authorization to transport LPG and petroleum products, including diesel.

NuStar stated that no significant physical changes to the pipeline would be required to transport petroleum products, and it is not proposing any new construction in the United States (aside from maintaining existing pipeline facilities). The Department of State will determine what kind of environmental documentation, if any, is appropriate for this proposed project.

Under E.O. 13337 the Secretary of State is designated and empowered to receive all applications for Presidential Permits for the construction, connection, operation, or maintenance at the borders of the United States, of facilities for the exportation or importation of liquid petroleum, petroleum products, or other fuels (except natural gas) to or from a foreign country. The Department of State will circulate this application to concerned federal agencies for comment. The Department of State has the responsibility to determine whether issuance of a new or amended Presidential Permit based upon NuStar's application would serve the U.S. national interest. The Department will issue a **Federal Register** notice later inviting public comment on whether issuance of the requested amended Presidential Permit would serve the national interest.

SUPPLEMENTARY INFORMATION:

Title: Surface Transportation Environment and Planning (STEP) Cooperative Research Program.

Background: Section 5207 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users of 2005 (SAFETEA-LU) established a new cooperative research program for environment and planning research in section 507 of Title 23, United States Code, Highways (23 U.S.C. 507). The general objective of the STEP is to improve understanding of the complex relationship between surface transportation, planning, and the environment. The FHWA anticipates that the STEP program will provide resources for national research on issues related to planning, environment and realty. These resources are likely to be included in future surface transportation legislation. The research program established under this section shall ensure that stakeholders are involved in the governance of the program, at the executive, overall program, and technical levels, through the use of expert panels and committees. FHWA will be collecting feedback via a STEP Web site on the 18 emphasis areas. This information will be used to identify potential research for an annual Research Plan.

The number of stakeholders with an interest in environment and planning research includes three groups:

- I—Federal Agencies and Tribal Governments
- II—State and Local Governments
- III—Nongovernmental Transportation and Environmental Stakeholders

Respondents: An estimated 270 participants annually for a total of approximately 810 participants during the three-year period while the OMB clearance is in effect.

Frequency: Annually.

Estimated Average Burden per Response: 30 minutes each year. Due to the specialized nature of the 18 emphasis areas, most commenters will provide input in only one area.

Estimated Total Annual Burden Hours: Approximately 135 hours annually (405 hours total for the three-year period).

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection of information is necessary for the U.S. DOT's performance, including whether

the information will have practical utility; (2) the accuracy of the U.S. DOT's estimate of the burden of the proposed information collection; (3) ways to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: January 13, 2014.

Michael Howell,

Information Collection Officer.
