EPA ICR Number: 0138.10.

OMB Control Number: 2040-0088.

Abstract: The Clean Water Act (CWA) section 301(h) program involves collecting information from two sources: (1) The municipal wastewater treatment facility, commonly called a publicly owned treatment works (POTW); and (2) the state in which the POTW is located. Municipalities had the opportunity to apply for a waiver from secondary treatment requirements, but that opportunity closed in December 1982. A POTW that seeks a section 301(h) waiver does so voluntarily to obtain or retain a benefit. A POTW seeking to obtain a 301(h) waiver, holding a

current waiver, or reapplying for a waiver, provides application, monitoring, and toxic control program information. The state provides information on its determination whether the proposed conditions of the waiver ensure the protection of water quality, biological habitats, and beneficial uses of receiving waters, and whether the discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. The state also provides information to certify that the discharge will meet all applicable state laws and that the state accepts all permit conditions. EPA requires updated information on the discharge to: (1) Determine whether the section 301(h) criteria are still being met and whether the section 301(h) waiver should be reissued; (2) determine whether the water quality, biological habitats, and beneficial uses of the receiving waters are protected; and (3) ensure that the permittee is effectively minimizing industrial and nonindustrial toxic pollutant and pesticide discharges into the treatment works. EPA needs information from the state to: (1) Allow the state's views to be taken into account when EPA reviews the section 301(h) application and develops permit conditions; and (2) ensure that all state laws are met and that the state accepts all permit conditions. This information is the means by which the state can non-concur with a section 301(h) approval decision made by the EPA Regional office. Regulations implementing CWA section 301(h) are found at 40 CFR part 125, subpart G. The information covered by this information collection request involves treatment plant operating data, effects of POTWs' discharges on marine environments, and states' viewpoints on issues concerning effects of POTWs' discharges on marine environments.

Form Numbers: "None."

Respondents/affected entities: Entities potentially affected by this action are those municipalities that currently have section 301(h) waivers from secondary treatment, or have applied for a renewal of a section 301(h) waiver, and the states within which these municipalities are located.

Respondent's obligation to respond: Required to obtain or retain a benefit.

Estimated number of respondents: 37 (total).

Frequency of response: From once every five years, to varies case-by-case, depending on the category of information.

Total estimated burden: 59,370 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1.3 million (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the total estimated respondent burden compared with the ICR currently approved by OMB, due to changes in the respondent universe, program status, information needs, and the use of technology.

Richard T. Westlund,

Acting Director, Collection Strategies Division.
