Abstract: EPA's asbestos worker protection rule is designed to provide occupational exposure protection to state and local government employees who are engaged in asbestos abatement activities in states that do not have state plans approved by the Occupational Safety and Health Administration (OSHA). The rule provides protection for public employees not covered by the OSHA standard from the adverse health effects associated with occupational exposure to asbestos. Specifically the rule requires state and local governments to monitor employee exposure to asbestos, take action to reduce exposure to asbestos, monitor employee health and train employees about asbestos hazards.

The rule includes a number of information reporting and recordkeeping requirements. State and local government agencies are required to provide employees with information about exposures to asbestos and the associated health effects. The rule also requires state and local governments to notify EPA before commencing any asbestos abatement project. State and local governments must maintain medical surveillance and monitoring records and training records on their employees, must establish a set of written procedures for respirator programs and must maintain procedures and records of respirator fit tests. EPA will use the information to monitor compliance with the asbestos worker protection rule. This request addresses these reporting and recordkeeping requirements.

Responses to the collection of information are mandatory (see 40 CFR 763 Subpart G). EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA and 40 CFR Part 2.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are state and local government employers in 25 states, the District of Columbia, and certain U.S. Territories that have employees engaged in asbestos-related construction, custodial and brake and clutch repair activities without OSHA-approved state plans.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 22,488 (total).

Frequency of response: On occasion.

Total estimated burden: 363,517 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$14,548,910 per year, includes \$0 annualized capital or operation and maintenance costs.

Changes in the estimates: There is a very minor decrease of 6 burden hours per year compared with that identified in the ICR currently approved by OMB (from 363,523 hours to 363,517 hours). This change is an adjustment and is explained in the supporting statement.

John Moses,

Director, Collection Strategies Division.
