U.S. Customs and Border Protection

Modification of National Customs Automation Program (NCAP) Test Concerning Automated Commercial Environment (ACE) Cargo Release for Ocean and Rail Carriers

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This document announces U.S. Customs and Border Protection's (CBP's) plan to modify the National Customs Automation Program (NCAP) test concerning Cargo Release functionality in the Automated Commercial Environment (ACE). Originally, the test was known as the Simplified Entry Test because the test simplified the entry process by reducing the number of data elements required to obtain release for cargo transported by air. The test continues to be modified to provide more capabilities to test participants allowing CBP to deliver enhanced functionality. This notice modifies the ACE Cargo Release test to include expansion to the ocean and rail modes of transportation. This notice invites more participants to join the test.

DATES: The ACE Cargo Release test modifications set forth in this document are effective no earlier than January 5, 2014. The test will run until approximately November 1, 2015.

ADDRESSES: Comments or questions concerning this notice and indication of interest in participation in ACE Cargo Release should be submitted, via email, to Susan Maskell at susan.c.maskell@cbp.dhs.gov. In the subject line of your email, please use, "Comment on ACE Cargo Release". The body of the email should include information regarding

the identity of the ports where filings are likely to occur.

SUPPLEMENTARY INFORMATION:

Background

I. The National Customs Automation Program

The National Customs Automation Program (NCAP) was established in Subtitle B of Title VI—Customs Modernization, in the North American Free Trade Agreement Implementation Act (Pub. L. 103-182, 107 Stat. 2057, 2170, December 8, 1993) (Customs Modernization Act). See 19 U.S.C. 1411. Through NCAP, the initial thrust of customs modernization was on trade compliance and the development of the Automated Commercial Environment (ACE), the planned successor to the Automated Commercial System (ACS). ACE is an automated and electronic system for commercial trade processing which is intended to streamline business processes, facilitate growth in trade, ensure cargo security, and foster participation in global commerce, while ensuring compliance with U.S. laws and regulations and reducing costs for U.S. Customs and Border Protection (CBP) and all of its communities of interest. The ability to meet these objectives depends on successfully modernizing CBP's business functions and the information technology that supports those functions.

CBP's modernization efforts are accomplished through phased releases of ACE component functionality designed to replace a specific legacy ACS function. Each release will begin with a test and, if the test is successful, will end with implementation of the functionality through the promulgation of regulations governing the new ACE feature and the retirement of the legacy ACS function.

The ACE Cargo Release test was previously known as the Simplified Entry Test because the test simplified the entry process by reducing the number of data elements required to obtain release for cargo transported by air. Through phased releases of ACE component functionality this test has been expanded to allow all eligible participants to join the test for an

indefinite period regardless of the Customs-Trade Partnership Against Terrorism (C-TPAT) status of an importer self-filer or a customs broker.

For the convenience of the public, a chronological listing of **Federal Register** publications detailing ACE test developments is set forth below in *Section VII*, entitled, "Development of ACE Prototypes". The procedures and criteria applicable to participation in the prior ACE tests remain in effect unless otherwise explicitly changed by this or subsequent notices published in the **Federal Register**.

II. Authorization for the Test

The Customs Modernization Act provides the Commissioner of CBP with authority to conduct limited test programs or procedures designed to evaluate planned components of the NCAP. The test described in this notice is authorized pursuant to § 101.9(b) of title 19 of the Code of Federal Regulations (19 CFR 101.9(b)), which provides for the testing of NCAP programs or procedures. See Treasury Decision (T.D.) 95-21.

III. Expansion of ACE Cargo Release Test to Ocean and Rail Modes of Transportation

This document is announcing CBP's plan to expand the ACE Cargo Release test which allows for the filing capabilities by importers and customs brokers for cargo transported by air to include filing capabilities by importers and customs brokers for cargo transported by ocean and rail.

Eligibility Requirements

To be eligible to apply for this test, the applicant must: (1) Be a self-filing importer who has the ability to file ACE Entry Summaries certified for cargo release or a broker who has the ability to file ACE Entry Summaries certified for cargo release; or (2) have evinced the intent to file entry summaries in ACE.

Parties seeking to participate in this test must use a software package that has completed Automated Broker Interface (ABI) certification testing for ACE and offers the simplified entry message set prior to transmitting data under the test. See the General Notice of August 26, 2008 (73 FR 50337) for a complete discussion on procedures for obtaining an ACE Portal Account. Importers not self-filing must be sure their broker has the capability to file entry summaries in ACE.
