Docket Number: 13–050. Applicant: The University of Memphis, 275 Administration Building, 3720 Alumni Drive, Memphis, TN 38152–3370. Instrument: Electron Microscope. Manufacturer: FEI Company, Czech Republic. Intended Use: The instrument will be used for multiple objectives including understanding the interplay between structural, magnetic and electromagnetic properties of synthesized magnetic nanostructures, and promoting and improving the ability of implants to integrate into bone and to deliver locally therapeutic agents such as antimicrobials and/or growth factors. The experiments to be conducted will include observations of the nanometer scale morphology of biocompatible/biodegradable hydrogel systems, the determination of how various therapeutic drugs affect the microscopic cellular architecture, determining the limit of feature size that can be fabricated using E-beam lithography from sensor materials, and determining the spatial limits in simultaneous multi-analyte electrochemical sensing. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: December 12, 2013.

Docket Number: 13–051. Applicant: The Scripps Research Institute, 10550 North Torrey Pines Road, M/S BCC–206, La Jolla, CA 92037. Instrument: Transmission Electron Microscope—Titan Krios. Manufacturer: FEI

Company, the Netherlands. Intended Use: The instrument will be used to gain significant insight into the manner in which macromolecular assemblies perform crucial life processes by determining the three-dimensional structure of these macromolecular assemblies. The instrument will be used to determine the manner in which biological assemblies function and the mechanisms through which they interact with other cellular components. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: December 16, 2013.
