#### Maine Tidal Power; Notice of Preliminary Permit Application Accepted For Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On December 2, 2013, Maine Tidal Power filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Half Moon Cove Tidal Power Project (Half Moon Cove Project) to be located in Cobscook and Passamaquoddy Bay, near the cities of Eastport and Perry, Washington County, Maine. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners’ express permission.

The proposed project would consist of the following: (1) A new 1,200-foot-long tidal wall with a crest elevation of approximately 27 feet above mean sea level (msl); (2) a new 60-foot-wide, 20-foot-high filling and emptying gate; (3) the 850-acre Half Moon Cove with a surface elevation of 13.0 feet above msl; (4) a new 60-foot-wide, 125-foot-long gated powerhouse with four turbine generating units with a total capacity of 21.5 megawatts; (5) a new 34.5 kilovolt, 7.1-mile-long transmission line extending from the project powerhouse to an existing substation owned by Bangor Hydroelectric Company located in the town of Pembroke, ME (the point of interconnection with the distribution grid); and (6) appurtenant facilities. The estimated annual generation of the Half

Moon Cove Project would be 30,000 megawatt-hours.
