[Project No. 14564-000]

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications; FFP Project 1, LLC

On November 13, 2013, FFP Project 1, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project to be located at the U.S. Army Corps of Engineers' (Corps) Columbia Lock & Dam, on the Ouachita River near the town of Columbia in Caldwell County, Louisiana. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of one of three alternatives:

Alternative One: (1) Integration of two to four modular generation units in each of the four existing gate bays for a total capacity of 12 megawatts (2) a 40-foot-long, 60-foot-wide control building located on the west side of the river (3) a 12,000-foot-long, 34kV transmission line.

Alternative Two: (1) An intake structure and associated tailrace opposite the lock structure on the west side of the river; (2) a 150-foot-long, 150-foot-wide, 55-foot-high concrete power house containing four generating units with a total capacity of 12 megawatts (3) a 12,000-foot-long, 34kV transmission line.

Alternative Three: (1) An intake structure, intake channel and associated tailrace at the existing closure dam to the south-east of the lock structure on the east side of the river; (2) a 150-foot-long, 150-foot-wide, 55-foot-high concrete power house containing four generating units with a total capacity of 12 megawatts, (3) a 12,000-foot-long, 34kV transmission line.

The project would have and average annual generation of 50,000 megawatt-hours and operate as directed by the Corps.
