Abstract: The NESHAP for Gold Mine Ore Processing (40 CFR Part 63, Subpart EEEEEEE) were proposed on April 28, 2010, and promulgated on December 16, 2010. The owner or operator of either an existing or new affected source is required to prepare and submit an initial notification report of applicability and an initial notification of compliance status. Each owner or operator of either an affected source is required to keep records to document compliance with the mercury emission limits and also maintain records of all monitoring data and specified process throughput data. If a deviation from the rule requirements occurs, an affected source is required to submit a compliance report for that semi-annual reporting period.

Form Numbers: None.

Respondents/affected entities: Owners or operators of gold mine ore processing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart EEEEEEE).

Estimated number of respondents: 21 (total).

Frequency of response: Initially, semiannually, and annually.

Total estimated burden: 2,358 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

Total estimated cost: \$445,124 (per year), which includes \$227,130 in either

annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent burden and a decrease in Agency burden. In addition, there is a decrease in total capital and O&M costs. This situation is not due to any program changes. The changes in the burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance (new facilities) as compared to on-going compliance (existing facilities). The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment, preparing initial notifications, and establishing recordkeeping systems. This ICR largely reflects both the on-going burden and costs for existing facilities. Activities for existing source include the continuously monitoring of mercury and the submission of annual and semiannual reports.

Richard T. Westlund,
Acting Director, Collection Strategies Division.

II. Background

On a biannual interval, an Exposure Modeling Public Meeting (EMPM) is held for presentation and discussion of current issues related to modeling pesticide fate, transport, and exposure for risk assessment in a regulatory context. Meeting dates and abstract requests are announced through the "empmlist" forum on the LYRIS list server at https://lists.epa.gov/read/all_forums/. The EMPM scheduled for October 2013 was canceled due to the government shutdown. As a consequence, EPA will use the October 2013 agenda at the March 24, 2014 meeting with the addition of a presentation on PRZM-GW model implementation and evaluation due to extensive stakeholder interest.

III. How can I request to participate in this meeting?

You may submit a request to participate in this meeting to the person listed under **FOR FURTHER INFORMATION CONTACT**. Do not submit any information in your request that is considered CBI. Requests to participate in the meeting, identified by docket ID number EPA-HQ-OPP-2009-0879, must be received on or before March 7, 2014.
