SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813, authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners.

Under Title 30 of the Code of Federal Regulations (CFR), MSHA has requirements that address hoists and appurtenances, including wire rope, used for hoisting persons. The requirements address both metal and nonmetal surface and underground

mines (30 CFR parts 56 and 57); and underground coal and surface work areas of underground coal mines (30 CFR parts 75 and 77).

Title 30 CFR 56/57.19022 and 30 CFR 75/77.1432 requires the diameter of newly installed wire rope to be measured at least once in every third interval of the rope's active length to establish a baseline for subsequent semiannual measurements. A record of the measurements is required to be made and retained until the rope is retired from service.

Title 30 CFR 56/57.19023 and 30 CFR 75/77.1433 require the wire rope to be visually examined at least every fourteen days for visible structural damage, corrosion, and improper lubrication or dressing. If the examination reveals weakening portions of the rope, the weakened portions must be monitored daily for further deterioration until retirement criteria require that the rope be removed from service. The person conducting the examination must certify that the examination was made and the record must be retained for one year.

Title 30 CFR 56/57.19121 requires the person conducting the inspection, test or examination of hoisting equipment certify that these activities have been done. Any unsafe conditions must be noted in a record and dated. All certifications and records must be retained for one year.

Title 30 CFR 75.1400–2 requires a record to be made of tests conducted on safety catches. Safety catches are the last means to safely stop a falling conveyance in the event of rope or equipment failure.

Title 30 CFR 75.1400–4 and 77.1404 require a record to be made of each daily examination. If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year.

Title 30 CFR 77.1906 requires a daily examination of hoists used for shaft sinking. If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year.
