Title: Data Collection for Container Availability.

OMB Number: 0581–0276.

Expiration Date of Approval: September 30, 2014.

Type of Request: Extension without change of a currently approved information collection.

Abstract: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627) directs and authorizes the collection and dissemination of marketing information including adequate outlook information, on a market area basis, for the purpose of anticipating and meeting consumer requirements aiding in the maintenance of farm income and to bring about a balance between production and utilization.

As part of the Agricultural Marketing Service, the Transportation Services Division (TSD) provides insightful agricultural transportation information and analysis to help move agricultural products to market. TSD informs, represents, and assists agricultural shippers and government policymakers through: Market reports, representation, analysis, assistance, and responses to inquiries. TSD collects data for its analysis from public resources as well as unique data sources to help the agricultural exporters make the most out of the transportation options available.

The Data Collection for Container Availability provides U.S. agricultural exporters with weekly data detailing the availability of containers at 18 select locations around the country. AMS collects these data on a voluntary basis from ocean container carriers and then

provides these up-to-date data in an aggregate report on its Web site. The goal of the report is to provide more transparency in the market for the location and availability of marine shipping containers for U.S. exporters. Exporters use this tool to make more knowledgeable decisions about which locations provide the best chance for finding available containers to move their products overseas.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.61 hours per response.

Respondents: Ocean Container/Liner Carriers and the Transpacific Stabilization Agreement.

Estimated Number of Respondents: 21.

Estimated Total Annual Responses: 1,092.

Estimated Number of Responses per Respondent: 52.
