

credentials will be managed and authenticated by Google, an Identity Provider approved by the Federal Government. During the login process participants will be redirected to a Google owned and operated login page. Following successful authentication of Id and password, participants are asked by Google to confirm agreement to their Google email address being shared with 'iCoast'. Users have the option to decline this and halt the login process with no information shared to 'iCoast'. If a participant accepts the sharing of their email address then the USGS will store the address within the 'iCoast' database. 'iCoast' is never supplied nor does it request a participant's password directly. Storing of the participant's email address by 'iCoast' is necessary to permit the pairing of Google login credentials with their 'iCoast' profile. The USGS will encrypt all stored participant email addresses. No other information or Google account access is shared by Google to 'iCoast' and nothing is shared from 'iCoast' to Google at any time.

(2) *Level of expertise*: At initial log in to 'iCoast', the participant will be asked to indicate what type of 'crowd' or group he or she belongs to by picking from a pre-determined list (e.g. coastal scientist, coastal planner, coastal resident, general public etc.). The participant may also optionally contribute his or her professional affiliation in an open text box, but this is not required. Professional affiliation may provide additional information to the scientists to more fully assess the accuracy of a participant's classifications. Provision of level of expertise alone will not allow an individual to be personally identified.

(3) *Keyword tagging*: After comparing pre-and post-storm aerial photographs, participants can select predefined keyword tags OR they can submit their own in a free-form text field. The keyword tags will help the USGS determine classification accuracy, and confirm or refute pre-storm predictions of coastal inundation and damage derived from the mathematical storm surge models.

This application will have many benefits. It will serve the cause of open government and open data, in that these images will be available to the public in an easily accessible online format for the first time. It will enhance the science of coastal change and allow for more accurate storm surge predictions, benefitting emergency managers and coastal planners. It will also familiarize coastal communities with coastal processes and increase their awareness of vulnerabilities to extreme storms. We

anticipate that this application will be used by educators to further science, technology, engineering and mathematics (STEM) education; outreach to educators is planned.

OMB Control Number: 1028–NEW.

Title: iCoast—Did the Coast Change?

Type of Request: New information collection.

Affected Public: Coastal scientists, coastal managers, marine science students, emergency managers, citizens/residents of coastal communities.

Respondent's Obligation: None. Participation is voluntary.

Frequency of Collection: Occasional.

Estimated Annual Number of Respondents: 1000.

Estimated Total Number of Annual Responses: 2500.

Estimated Time per Response: 30 minutes.

Estimated Annual Burden Hours: 1250.

Estimated Reporting and Recordkeeping "Non-Hour Cost" Burden: None.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, et seq.) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it is approved by the OMB and displays a valid OMB control number and current expiration date.

III. Request for Comments

We are soliciting comments as to: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Please note that the comments submitted in response to this notice are a matter of public record. Before including your personal mailing address, phone number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment, including your personally identifiable information, may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifiable information from public view, we

cannot guarantee that we will be able to do so.

Richard Z. Poore,

Center Director, USGS Coastal and Marine Science Center.

BILLING CODE 4311–AM–P

DEPARTMENT OF THE INTERIOR

Bureau of Indians Affairs

[AAK4004200/A0R5C4040.999900/134A2100DD]

Proclaiming Certain Lands, White Horse Golf Course Property, as an Addition to the Port Madison Indian Reservation for the Suquamish Tribe

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Reservation Proclamation.

SUMMARY: This notice informs the public that the Assistant Secretary—Indian Affairs proclaimed approximately 283.17 acres, more or less, as an addition to the Port Madison Indian Reservation for the Suquamish Indian Tribe.

FOR FURTHER INFORMATION CONTACT: Matthew C. Kirkland, Bureau of Indian Affairs, Division of Real Estate Services, MS–4642–MIB, 1849 C Street NW., Washington, DC 20240, telephone (202) 208–3615.

SUPPLEMENTARY INFORMATION: This Notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by part 209 of the Departmental Manual.

A proclamation was issued according to the Act of June 18, 1934 (48 Stat. 986; 25 U.S.C. 467) for the land described below. The land was proclaimed to be an addition to the Port Madison Indian Reservation of the Suquamish Indian Tribe of Washington, for the exclusive use of Indians entitled by enrollment or tribal membership to reside at such reservation.

Willamette Meridian

Kitsap County, Washington

Legal description of the trust property including +/- 283.17 acres is:

Vacated tracts E, F, G, I and J and portions of vacated Tracts D, H and P of the Plat of White Horse, recorded under Auditor's file Number 200502020210 in Volume 31 of Plats, Page 139 through 157, inclusive, records of Kitsap County, Washington; being within Section 3 of Township 26 North, Range 2 East of the Willamette Meridian in Kitsap County,

Washington as vacated by Final Order of Vacation recorded under Auditor's File Number 201111070157, records of said County, totaling 283.17 acres, more or less.

Situate in the County of Kitsap, State of Washington.

The above-described lands contain a total of 283.17 acres, more or less, which is subject to all valid rights, reservations, rights-of-way, and easements of record.

This proclamation does not affect title to the land described above nor does it affect any valid existing easements for public roads and highways, for public utilities and for railroads and pipelines and any other rights-of-way or reservations of record.

Dated: February 21, 2014.

Kevin K. Washburn,

Assistant Secretary—Indian Affairs.

Notice of Availability of the Final Environmental Impact Statement for the Ochoa Mine Project in Lea County, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared a Final Environmental Impact Statement (EIS) for the Ochoa Mine Project and by this notice is announcing its availability.

DATES: The BLM will not issue a final decision on the proposal for a minimum of 30 days from the date that the Environmental Protection Agency publishes its own notice of availability in the **Federal Register**.

ADDRESSES: Copies of the Ochoa Mine Project Final EIS are available for public inspection at the Carlsbad Field Office, 620 E Greene Street, Carlsbad, NM 88220. Interested persons may also review the Final EIS on the Web site at: www.nm.blm.gov/cfo/ochoaMine/.

FOR FURTHER INFORMATION CONTACT: David Herrell or Shiva Achet, project co-leads, telephone 575-234-2229

(David) or 575-234-5924 (Shiva); address BLM Carlsbad Field Office, 620 East Greene Street, Carlsbad, NM 88220; email blm_nm_cfo_comments@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at: 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

Intercontinental Potash Corporation (ICP) is proposing to develop a new underground mine in southern Lea County, New Mexico, to extract polyhalite ore for the production of the sulfate of potash and sulfate of potash magnesia, potassium fertilizers for food production. The project area includes Federal, State, and private lands totaling 31,134 acres, of which 2,400 acres would be disturbed. The surface landownership consists of about 22 percent public lands managed by the BLM, 53 percent owned by the State of New Mexico, and 25 percent privately owned. About 55 percent of the minerals within the proposed mine area is owned by the Federal Government.

ICP holds BLM prospecting permits and has applied for preference right leases. These prospecting permits are located about 40 miles southeast of Carlsbad and 20 miles west of Jal, in Lea County, New Mexico. ICP has proposed a Mine Plan of Operations that includes an underground mine accessed by a shaft and a ramp, and processing facilities, including the ore process plant, dry stack tailings pile, evaporation ponds, water wells, pipelines, power lines, and a railroad load out facility. The polyhalite will be continuously mined using the conventional room and pillar retreat method. In order to mine in proximity to active oil and gas wells, ICP has elected to follow the rules and regulations of a Category IV gassy mine. Processing would require pumping a maximum of 4,000 gallons per minute of groundwater from the Capitan Reef Aquifer.

The BLM initiated the NEPA process for the project by publication of a Notice of Intent to prepare an EIS on January 3, 2012 (77 FR 130). Public scoping meetings were conducted on January 23-24, 2012. Major issues identified for this project include oil and gas, water resources, land use, socioeconomic impacts, air quality, wildlife, livestock grazing, and health and safety. A

scoping report was compiled and published on March 27, 2012.

Alternatives developed in the Draft EIS include the proposed action (Alternative A), which would include approval of ICP's Mine Plan of Operations, granting new rights-of-way, and approval of preference right leases to allow the mining and processing of polyhalite ore for the production of the sulphate of potash and sulphate of potash magnesia. In addition, three action alternatives were analyzed in the Draft EIS. Alternative B is identical to Alternative A except that the visual impacts of the tailing stockpile would be reduced. Alternative C is identical to Alternative A except that standards and guidance would be established for managing concurrent development of fluid minerals. Alternative D is similar to Alternative A, except that the location of the evaporation ponds and tailings stockpile would be at a different location. A no action alternative was also analyzed, in which the proposed mine plan of operations, rights-of-way, and preference right leases would be denied.

The Draft EIS was published on August 9, 2013, starting a 45-day public comment period. Three public scoping meetings were held in Carlsbad, New Mexico, on August 26, 2013, and in Hobbs and Jal, New Mexico, on August 27, 2013. Briefings were also held for the City of Eunice, New Mexico, and a cooperating agency. Twenty-nine written comment letters consisting of 490 comments were received and analyzed. Comments on the Draft EIS received from the public and internal BLM review were considered and incorporated as appropriate into the Final EIS. The Final EIS Preferred Alternative consists of a mixture of what the BLM considers the best features of Alternatives A, B, and C, as well as some new aspects incorporated in response to public comments and BLM concerns. The Preferred Alternative is similar to the proposed action (Alternative A), as it incorporates the same proposed mine area, mining methods, facilities, and processing methods. Additionally, water demands, well field and water pipelines, and layout facilities remain the same as the proposed action. The Preferred Alternative differs from the proposed action as it requires additional monitoring of water resources, includes subsidence, dust, and reclamation requirements, a smaller tailings stockpile, a more formalized co-development coordination program with stakeholders, and a dispute resolution process.
