The pallid sturgeon (*Scaphirhynchus albus*), found in the Missouri and Mississippi River basins of the United States, was listed as an endangered species on September 6, 1990 (55 FR 36641). The original pallid sturgeon recovery plan was approved in 1993. The revised recovery plan documents the current understanding of the species life history requirements, identifies threats to the species, includes revised recovery criteria, and describes those actions believed necessary to eventually delist the species.
