

Service (NASS) is to prepare and issue current official State and national estimates of crop and livestock production, disposition, and prices. Services such as statistical consultation, data collection, summary tabulation, and analysis are performed for other Federal and State agencies on a reimbursable basis as the need arises. Equine surveys have previously been conducted in fifteen States where equine is a significant portion of their agriculture. The results are used to provide an assessment of the equine industry's contribution to the State's economy in terms of infrastructure and value.

**Need and Use of the Information:** NASS will collect information on equine inventories, by category; equine revenue, by activity; and equine related expenditures, by purpose. In addition, these surveys will provide NASS with names and addresses of equine operations that can be used for Census of Agriculture enumeration and for the NASS program that seeks to cover 99 percent of U.S. agricultural cash receipts.
