RIN 0648-XD126

Identification of Nations Engaged in Illegal, Unreported, or Unregulated Fishing, Bycatch, or Shark Fishing

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: NMFS is seeking information regarding nations whose vessels are engaged in illegal, unreported, or unregulated (IUU) fishing, bycatch of protected living marine resources (PLMRs), and/or fishing activities in waters beyond any national jurisdiction that target or incidentally catch sharks. Such information will be reviewed for the purposes of the identification of nations pursuant to the High Seas Driftnet Fishing Moratorium Protection Act (Moratorium Protection Act).

DATES: Information should be received on or before May 30, 2014.

ADDRESSES: Information should be submitted to NMFS Office of International Affairs, Attn.: MSRA Information, F/IA 1315 East-West Highway, Silver Spring, MD 20910. Email address: IUU.PLMR.Sharks@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Kristin Rusello, 301-427-8376.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Reauthorization Act of 2006 (MSRA) amended the Moratorium Protection Act (16 U.S.C. 1826d-k) to require actions

be taken by the United States to strengthen international fishery management organizations and address IUU fishing and bycatch of PLMRs. The Shark Conservation Act of 2010 (S.850) further amended the Moratorium Protection Act by requiring that actions be taken by the United States to strengthen shark conservation.

Specifically, the Moratorium Protection Act requires the Secretary of Commerce (Secretary) to identify in a biennial report to Congress those nations whose fishing vessels are engaged, or have been engaged at any point during the preceding two years, in IUU fishing. The definition of IUU fishing can be found at 50 CFR 300.201 and includes:

(1) Fishing activities that violate conservation and management measures required under an international fishery management agreement to which the United States is a party, including catch limits or quotas, capacity restrictions, bycatch reduction requirements, shark conservation measures, and data reporting;

(2) In the case of non-parties to an international fishery management agreement to which the United States is a party, fishing activities that would undermine the conservation of the resources managed under that agreement;

(3) Overfishing of fish stocks shared by the United States, for which there are no applicable international conservation or management measures or in areas with no applicable international fishery management organization or agreement, that has adverse impacts on such stocks;

(4) Fishing activity that has an adverse impact on vulnerable marine ecosystems such as seamounts, hydrothermal vents, cold water corals and other vulnerable marine ecosystems located beyond any national jurisdiction, for which there are no applicable conservation or management measures or in areas with no applicable international fishery management organization or agreement; and

(5) Fishing activities by foreign flagged vessels in U.S. waters without authorization of the United States.

In addition, the Secretary must identify in the biennial report those nations whose fishing vessels are engaged, or have been engaged in the previous calendar year in fishing activities in waters beyond any national jurisdiction that result in bycatch of a PLMR, or the U.S. exclusive economic zone (EEZ) that result in bycatch of a PLMR shared by the United States. In this context, PLMRs are defined as non-target fish, sea turtles, sharks, or marine mammals that are protected under U.S.

law or international agreement, including the Marine Mammal Protection Act, the Endangered Species Act, the Shark Finning Prohibition Act, and the Convention on International Trade in Endangered Species of Wild Flora and Fauna. PLMRs do not include species, except sharks, managed under the Magnuson-Stevens Fishery Conservation and Management Act, the Atlantic Tunas Convention Act, or any international fishery management agreement. A list of species considered as PLMRs for this purpose is available online at: http://www.nmfs.noaa.gov/msa2007/docs/list_of_protected_lmr_act_022610.pdf.

Furthermore, the Shark Conservation Act requires that the Secretary of Commerce identify nations in a biennial report to Congress whose fishing vessels are engaged, or have been engaged during the calendar year previous to the biennial report in fishing activities or practices in waters beyond any national jurisdiction that target or incidentally catch sharks and the nation has not adopted a regulatory program to provide for the conservation of sharks, including measures to prohibit removal of any of the fins of a shark (including the tail) and discarding the carcass of the shark at sea, that is comparable to that of the United States, taking into account different conditions.

The third biennial report to Congress was submitted in January 2013 and is available online at: http://www.nmfs.noaa.gov/ia/iuu/msra_page/2013_biennial_report_to_congress_jan_11_2013_final.pdf. The report identified ten nations for IUU fishing, with one of the ten also identified for bycatch of a PLMR.

In accordance with the Moratorium Protection Act, NMFS has established procedures through regulations to identify and certify each nation whose vessels are engaged in IUU fishing, bycatch of PLMRs, and/or shark catch. Once identified, if a nation fails to take appropriate action and therefore fails to receive a positive certification, the fishing vessels of that nation would be subject to denial of entry to U.S. ports and other trade restrictive measures, including import prohibitions on certain fisheries products, under the High Seas Driftnet Fisheries Enforcement Act (16 U.S.C. 1826a). On January 16, 2013, NMFS published the latest final rule (78 FR 2013) implementing identification and certification procedures for IUU fishing, bycatch of PLMRs, and shark catch. That final rule is available online at: http://www.nmfs.noaa.gov/ia/iuu/msra_page/shark_iuu_rule.pdf. The rule provides information regarding the identification process and how the

information received will be used in that process. These regulations are also codified at 50 CFR 300.200 *et seq.*

In fulfillment of its requirements under the Moratorium Protection Act, NMFS is preparing the fourth biennial report to Congress, which will identify nations whose fishing vessels are engaged in IUU fishing or fishing practices that result in bycatch of PLMRs or shark catch in waters beyond any national jurisdiction without a regulatory program comparable to the United States. NMFS is soliciting information from the public that could assist in its identification of nations engaged in activities that meet the criteria described above for IUU fishing, PLMR bycatch, or shark catch in waters beyond any national jurisdiction. Some types of information that may prove useful to NMFS include:

- Documentation (photographs, etc.) of IUU activity or fishing vessels engaged in PLMR bycatch or catch of sharks on the high seas;
- Fishing vessel records;
- Trade data supporting evidence that a nation's vessels are engaged in shark catch;
- Reports from off-loading facilities, port-side government officials, enforcement agents, military personnel, port inspectors, transshipment vessel workers and fish importers;
- Sightings of vessels on RFMO IUU vessel lists;
- RFMO catch documents and statistical document programs;
- Nation's domestic regulations for bycatch and shark conservation and management;
- Species or fin identification guides for sharks in foreign waters;
- Appropriate certification programs;
- Action or inaction at the national level, resulting in non-compliance with RFMO conservation and management measures, such as exceeding quotas or catch limits, or failing to report or misreporting data of the nation's fishing activities; and
- Reports from governments, international organizations, or nongovernmental organizations.

NMFS will consider all available information, as appropriate, when making a determination whether or not to identify a particular nation in the biennial report to Congress. As stated previously, NMFS is limited in the data it may use as the basis of a nation's identification. This information includes IUU fishing activity in 2013 and 2014, bycatch of PLMRs in 2014, and shark fishing activity in waters beyond any national jurisdiction in 2014. Information should be as specific as possible as this will assist NMFS in

its review. NMFS will consider several criteria when determining whether information is appropriate for use in making identifications, including:

- Corroboration of information;
- Whether multiple sources have been able to provide information in support of an identification;
- The methodology used to collect the information;
- Specificity of the information provided;
- Susceptibility of the information to falsification and alteration; and
- Credibility of the individuals or organization providing the information.

Dated: February 27, 2014.

Jean-Pierre Plé,

Acting Director, Office of International Affairs, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Russian River Estuary Management Activities

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; proposed incidental harassment authorization; request for comments.

SUMMARY: NMFS has received a request from the Sonoma County Water Agency (SCWA) for authorization to take marine mammals incidental to Russian River estuary management activities. Pursuant to the Marine Mammal Protection Act (MMPA), NMFS is requesting comments on its proposal to issue an incidental harassment authorization (IHA) to SCWA to incidentally take marine mammals, by Level B harassment only, during the specified activity.

DATES: Comments and information must be received no later than April 4, 2014.

ADDRESSES: Comments on the application should be addressed to Jolie Harrison, Supervisor, Incidental Take Program, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Physical comments should be sent to 1315 East-West Highway, Silver Spring, MD 20910 and electronic comments should be sent to ITP.Laws@noaa.gov.

Instructions: NMFS is not responsible for comments sent by any other method,

to any other address or individual, or received after the end of the comment period. Comments received electronically, including all attachments, must not exceed a 25-megabyte file size. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. All comments received are a part of the public record and will generally be posted to the Internet at <http://www.nmfs.noaa.gov/pr/permits/incidental.htm> without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Availability

An electronic copy of SCWA's application and supporting documents, as well as a list of the references cited in this document, may be obtained by visiting the Internet at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm>. In case of problems accessing these documents, please call the contact listed above (see **FOR FURTHER INFORMATION CONTACT**).

National Environmental Policy Act (NEPA)

NMFS has prepared an Environmental Assessment (EA; 2010) and associated Finding of No Significant Impact (FONSI) in accordance with NEPA and the regulations published by the Council on Environmental Quality. These documents are posted at the aforementioned Internet address. Information in SCWA's application, NMFS' EA (2010), and this notice collectively provide the environmental information related to proposed issuance of this IHA for public review and comment. We will review all comments submitted in response to this notice as we complete the NEPA process, including a decision of whether to reaffirm the existing FONSI, prior to a final decision on the incidental take authorization request.

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified area, the incidental, but not intentional, taking of small numbers of marine
