Abstract: Owners or operators of the affected facilities described must make one-time-only notifications. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Monitoring requirements specific to Equipment Leaks of VOC in Petroleum Refineries provide information on which components are leaking VOCs. NSPS Subpart GGG references the compliance requirements of NSPS subpart VV; and NSPS subpart GGGa references the compliance requirements of NSPS subpart VVa. Periodically, owners or operators are required to record information identifying leaking equipment, repair methods used to stop the leaks, and dates of repair. The time period for this recordkeeping varies and depends on equipment type and leak history. Semiannual reports are required to measure compliance with the standards of NSPS Subparts VV and VVa, as referenced by NSPS subparts GGG and GGGa. These notifications, reports, and records are essential in determining compliance and in general, are required of all sources subject to NSPS. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records.

Form Numbers: None.

Respondents/affected entities: Petroleum refineries.

Respondent's obligation to respond: Mandatory (40 CFR part 60, Subparts GGG and GGGa).

Estimated number of respondents: 130.

Frequency of response: Initially and semiannually.

Total estimated burden: 24,886 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,434,325 (per year), including no annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There are several changes to the estimated burden as currently identified in the OMB Inventory of Approved Burdens. These differences are not due to any program changes. There is a decrease in the respondent and Agency burden for subpart GGG due to a correction of the number of respondents from 135 to 130. In addition, there is an increase in the respondent burden for subpart GGGa due to a mathematical correction. The previous ICR incorrectly calculated the amount of time it would take to record operating parameters at large and small refineries for subpart GGGa. This ICR also updates all burden costs to reflect current labor rates. These changes result in an overall increase in respondent burden and a decrease in Agency burden for both subparts combined.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; The Consolidated Air Rule (CAR) for the Synthetic Organic Chemical Manufacturing Industry (SOCMI) (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "The Consolidated Air Rule (CAR) for the Synthetic Organic Chemical Manufacturing Industry (SOCMI) (Renewal)" (EPA ICR No. 1854.09, OMB Control No. 2060-0443), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through April 30, 2014. Public

comments were previously requested via the **Federal Register** (78 *FR* 35023) on June 11, 2013 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before April 10, 2014.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2013-0350, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Abstract: The synthetic organic chemical manufacturing industry (SOCMI) is regulated by both the New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) standards. The affected entities are

subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes or additions to the Provisions specified at 40 CFR part 60, subparts Ka, Kb, VV, VVa, DDD, III, NNN and RRR. The affected entities are also subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subparts BB, Y, V, F, G, H and I. As an alternative, SOCOMI sources may choose to comply with the above standards under the consolidated air rule (CAR) at 40 CFR part 65 as promulgated December 14, 2000. Synthetic organic chemical manufacturing facilities subject to NSPS requirements must notify EPA of construction, modification, startups, shutdowns, date and results of initial performance test and excess emissions. Semiannual reports are also required. Synthetic organic chemical manufacturing facilities subject to NESHAP requirements must submit one-time-only reports of any physical or operational changes and the results of initial performance tests. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Periodic reports are also required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of synthetic organic chemical manufacturing facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart A, Ka, Kb, VV, VVa, DDD, III, NNN and RRR; and 40 CFR part 63, subpart A, BB, Y, V, F, G, H and I).

Estimated number of respondents:

4,618 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 2,130,669 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$309,692,801 (per year), which includes \$101,277,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated respondent labor burden and associated labor, capital/startup, and O&M costs. Overall, the change in burden from the most recently approved ICR is due to an increase in the number of sources subject to the standard, and is not due to any program changes. The number of sources has been increased to reflect industry growth, which in turn

increased the cost of those subparts where growth is expected.

There is a further overall increase in respondent burden costs from the most recently approved ICR due to the use of updated labor rates. This ICR references labor rates from the Bureau of Labor Statistics to calculate respondent burden costs. Note that this ICR also references labor rates from OPM to calculate Agency costs; however, the update did not affect Agency costs since the rates are identical between this and the most recently-approved ICR.
