

subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes or additions to the Provisions specified at 40 CFR part 60, subparts Ka, Kb, VV, VVa, DDD, III, NNN and RRR. The affected entities are also subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subparts BB, Y, V, F, G, H and I. As an alternative, SOCOMI sources may choose to comply with the above standards under the consolidated air rule (CAR) at 40 CFR part 65 as promulgated December 14, 2000. Synthetic organic chemical manufacturing facilities subject to NSPS requirements must notify EPA of construction, modification, startups, shutdowns, date and results of initial performance test and excess emissions. Semiannual reports are also required. Synthetic organic chemical manufacturing facilities subject to NESHAP requirements must submit one-time-only reports of any physical or operational changes and the results of initial performance tests. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Periodic reports are also required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of synthetic organic chemical manufacturing facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart A, Ka, Kb, VV, VVa, DDD, III, NNN and RRR; and 40 CFR part 63, subpart A, BB, Y, V, F, G, H and I).

Estimated number of respondents:

4,618 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 2,130,669 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$309,692,801 (per year), which includes \$101,277,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated respondent labor burden and associated labor, capital/startup, and O&M costs. Overall, the change in burden from the most recently approved ICR is due to an increase in the number of sources subject to the standard, and is not due to any program changes. The number of sources has been increased to reflect industry growth, which in turn

increased the cost of those subparts where growth is expected.

There is a further overall increase in respondent burden costs from the most recently approved ICR due to the use of updated labor rates. This ICR references labor rates from the Bureau of Labor Statistics to calculate respondent burden costs. Note that this ICR also references labor rates from OPM to calculate Agency costs; however, the update did not affect Agency costs since the rates are identical between this and the most recently-approved ICR.
